Summary

Passionate developer with technical expertise from concept to delivery. Obsessed over customer outcomes. I have 4+ years' experience in web application software development. Prior experience in full stack programming, algorithm design and data model design. I'm very curious, a person of wide knowledge and self-learner. I'm well known for solving complex problem in fast phase.

Work Experience

Infoview Technologies as Full Stack Developer
Jun 2016 to Till Date

Projects Worked

(2016 - 2018) - HR Module (Developer)

Designed a HR web application using native JavaScript, CSS, HTML which allows companies to track employee records, attendance and their work performance.

Collaborated with technical experts in Delphi Conversion Web Project used to manage leave and attendance for many Japanese schools and institutions.

Analyzed Pascal code and converted them to Java language.

Technology learned were Java Servlets, MySQL and other basics.

(2018 - 2019) - Data Migration Project (Developer)

Worked as a team developer in developing an interface tool which helps to migrate data from one data base to another with error rectification.

The tool mainly focus on transferring data with high accuracy with the help of Multi-threading, Batch processing and designed using Spring, HTML5, Less.

Written Business validations for the owned use case. Unit testing and integration testing for the same using Spring Framework (JUnit).

(2019 - 2020) - SCM ERP Product (Team Leader & Developer)

Responsible for converting customers' requirements into highly responsive, bug free, and easy to use ERP function.

Planning, System Design, Function Design, Implementation, Test Case Scenario, Use case scenario, Source Code Management and supporting QE/QA are the main area of involvement

Designed database structure based on the use case and requirements.

Designed several framework components using Angular JS, RxJs which will be used throughout the project.
