Projects

Project Title: Demarcation Tool - Admin Portal

Client: **Genkey**

Nature of Employment: Full Time

Duration: Aug 2020 - Till Date

Onsite / Offsite: Offsite

Project Details: Roles & Responsibilities

Technical Architect :- technically managed and mentored team members

Design and implementation of Framework

Complete development, testing and bug fixing,

Technologies Used

Spring Boot, Thymeleaf, JQuery, Hibernate, Oracle/Postgres

This product was designed and developed for the client Genkey. This product has deployed for two clients of Genkey in two different environments(One in Postgres and the other in Oracle) . Only members of admin users groups can login to this portal and define their own demarcation details(State, Prefecture, Sub-prefecture, Village, County etc.) The defined demarcation will be approved by members of another higher authority admin groups. We can create new demarcation, move voters to the new demarcation, split voters. The approved demarcation will be transferred to the public voters portal's database through RestAPI (while maintenance).

Project Title: Health Companion

Client: **Health Companion**

Nature of Employment: Full Time

Role: **Solution Architect**

Duration: Jan 2014 - Till Date

Onsite / Offsite: Offsite

Team Size: 12

Skill Used: Struts2, Spring, Hibernate, Apache ActiveMQ, Oracle, Spring RestAPI, Cryptography(AES)

Role Description: Solution Specialist

Design and integration of new modules

Implementing Jenkins CI

HSM Integration

Project Details: Health Companion is a portal for patient engagement. All patient sensitive data are encrypted using the key which is stored in HSM. Health Companion was designed and implemented as SOA with dynamic code generation and integrated it with Health Companion in Continuous Integration(Jenkins). SOA implementation had done using Spring and REST API. In development environment, Health Companion will work as a single non-distributed project. In production and QA environments, it will work as an SOA architecture with 5 different services which can be deployed in 5 different servers.

Project Title: Direct Secure Messaging

Client: **Multiple Clients**

Nature of Employment: Full Time

Role: **Other**

Duration: Jan 2013 - Till Date

Onsite / Offsite: Offsite

Team Size: 6

Skill Used: Spring MVC, Hibernate, James Mail Server, DNS Server, Apache ActiveMQ, Oracle, Spring RestAPI, Cryptography(RSA, AES)

Role Description: Technical Architect :- technically managed and mentored team members

Design and implementation of Framework

Complete development, testing, bug fixing, application deployment

Implementing Jenkins CI

Certification process

Project Details: Direct messaging is a national encryption standard for securely exchanging patient health information via secure web e-mail. Regular e-mail or fax involves the inherent risks of information being compromised or accessed by unauthorized users. Direct Messaging uses strong encryption methods for securely transmitting message over SMTP protocol
