Project Overview:

An online home services marketplace which connects home service professionals to the customers where user can book their service for repairing or installation at their doorstep within the time slot they want. It was developed using PHP, HTML, CSS, JAVASCRIPT, JQUERY, AJAX and MYSQL database was used.

This website was also consisting of Admin Panel where admin can change the main content from its panel and which will reflect the website. Admin can manage the services which were booked and assign to the vendor which is applicable and can also change the status of job booked and can know the status of a particular job.

Project Title: (Web Application) at wow.blastistic.com

Project Overview:

An online e-commerce website that allows visitors to an Internet site to select items for eventual purchase from the website It was developed using PHP, HTML, CSS, JAVASCRIPT, JQUERY, AJAX, and MYSQL database was used.

The website has Admin panel and Seller panel to access the seller panel seller has to register their account and sell their product after uploading the product which he wants to sell to the website and seller can manage their account through the panel. It can also access the record of their products.

Admin can manage the seller and has full authority to manage the product and can create unlimited categories, Inventory management can be done by admin as well as the seller.

Although the site is not completely filled with content, as the customer doesn't make a lot of planned advertising. I'm sure this site will be very popular after the proper advertising.
