## Projects

Project Title: OneBMS

Client: Cummins

Nature of Employment: Full Time

Project Location: Pune

Role: Other

Duration: Nov 2018 - Dec 2020

Onsite / Offsite: Offsite

Team Size: 12

Skill Used: PLSQL, Oracle SQL, Oracle Forms, Oracle Reports, Oracle Database, Unix Shell Scripting, Appworx

Role Description: My role as a Technical Consultant includes Requirement gathering, Feasibility Analysis, Designing solutions, Documentation, Development, Testing, and Deployment of the change requests and enhancements required by Cummins.

Project Details: BMS (Business Management System) is the application used by the distributor to perform the day to day business of sales and service of the Cummins Engines and parts to the end customers across 4 regions. North America, Southern Plains, Caribbean, Canada. The application is based on Oracle Forms and Reports 11G, Oracle Database, UNIX servers, Appworx (Job Automation), and multiple integrations with different Interfaces. I have worked on an upgrade project as well where the whole BMS was upgraded from Oracle 11G to 12C. New Instances (Dev, UAT, Stage, Production) were built from scratch. Along with it, intensive unit, system, and integration testing were also done.
