Backend engineer with 3 years of experience in building distributed systems for data processing.

Other Skills: Software Development, Software Application Development, Project Management, Requirement Gathering, Software Design, Data processing, Data Structures, Spring Framework, Struts2 Framework, Python, C, JAVA, Algorithm

Work Experience

Inmobi as Software Developer

Aug 2017 to Till Date

Kestrel

Objective: Kestrel is an in-house messaging client for producing and consuming from Azure Eventhub and aims to address some shortcomings of the azure offering.

Role: Was part of the core team responsible for the design of Kestrel. Was part of the development team that added support for compression, callback support and metrics in the library. Also was the main POC for on-boarding and issue management across the organisation

Epsilon Batch Analytics Platform

Objective: Epsilon is an end-to-end batch analytics platform with auto-scaling capabilities and provides an unified interface for running ad-hoc and scheduled queries and jobs.

Role: Was part of the team that added the initial features in the epsilon ecosystem like one- click provisioning, metrics support, dashboard, job submission APIs , auto-scale capabilities etc. Was responsible of the maintenance of the epsilon platform as its adoption grew inside the organisation.
