Tech Mahindra Limited, noida

Project: Risk and interface management system(RIMS)- Chevron Upstream

Overview of the system:

Chevron Corporation (NYSE: CVX Euronext: CHTEX) is an American multinational energy corporation. Headquartered in San Ramon, California, and active in more than 180 countries, it is engaged in every aspect of the oil, gas, and geothermal energy industries, including exploration and production; refining, marketing and transport; chemicals manufacturing and sales; and power generation. Chevron is one of the world's six "supermajor" oil companies; as of 2013, it ranked eleventh in the Fortune Global 500 list of the world's largest companies.

The Risk and Interface Management System (RIMS) is an integrated web-accessed database application for recording, monitoring, and reporting the following:

Project Execution Risks

Technical External and Internal Interfaces

Project OE/HES Recommendations and Action Items

Each of the above modules has a different objective, but all three share many of the same security access and administrative requirements.

Role: my roles/responsibilities was as follows

Involved actively in design, development stages of the software development cycle.

Involved in preparing Designs, writing Code, testing, debugging and documentation.

Developed procedures/functions in sql.

Written the reliable, reusable and optimized code for Asp.net.

Coded, Tested and debugged the programs for my application.

Creating/Updated the documents related to the releases.

Used the Agile methodology and coding as per SDK standards

Worked on all SDLC stages on various CRs and complex Rims Releases .
