

VENKATESH VANKAYALA

IT Analyst seeking roles in Software Development, Software Testing, Web Development, Application Development, Coding, Testing, Defect Management, Requirement Gathering, Automation Testing, Stakeholder Management, Cross-functional coordination

Current Designation: T Analyst t (Software Development/ Testing)

Total Experience: 5 Year(s) 5 Month(s)

Current Company: Tata Consultancy Services,

Notice Period: 3 Months

Current Location: Hyderabad / Secunderabad

Highest Degree: B.Tech/B.E.
[Electronics/Telecommunication]

Pref. Location: Bengaluru / Bangalore, Chennai, Hyderabad

Functional Area: IT Software - Application Programming / Maintenance

Role: Software Developer

Industry: IT-Software/Software Services

Marital Status: Single/unmarried

Key Skills: IT Analyst, Software Developer, Software Development, Software Testing, Web Development, Application Development, Coding, Testing, Defect Management, Requirement Gathering, Automation Testing, Stakeholder Management, Cross-functional coordination

Verified : Phone Number | Email - id

Last Active: 21-Jan-21

Last Modified: 21-Jan-21

Summary

IT Professional offering nearly 5 years of experience in Software Development (Web & Application Development) and Software Testing. Successfully managed the development of software products from requirement analysis to system study, designing, coding, testing, debugging, documentation, implementation and maintenance. Liaised with stakeholders during problem diagnosis, requirements gathering, detailed level design, development, system test and production development and implementation to ensure that optimal resolutions were achieved. Won On the Spot and Star Team Award for excellent contribution towards the project. Received appreciation from clients for providing regular updates on incidents and ensuring timely resolutions. Awarded with Savior Award for contributing towards the project during time of COVID-19. Worked on the Project Lifecycle methodology defined under the process framework; managed end-to-end management and monitored project progress as per scheduled deadlines.

Work Experience

Tata Consultancy Services, as T Analyst t (Software Development/ Testing)

Aug 2015 to Till Date

Growth Path

Aug'15 to Jul'16 as Trainee

Aug'16 to Jul'19 as Assistant System Engineer

Aug'19 to Till Date as IT Analyst

Key Result Areas:

Managing Software Development Lifecycle (SDLC) right from requirement analysis, documentation (functional specifications, technical design), coding and testing to maintenance of proposed web applications

Developing software solutions by studying information needs, conferring with users, studying systems flow, data usage, and work processes

Formulating solutions for technical specifications; installing application software and deploying customizations

Contributing to software improvements (products, processes, methods, tools), design inspection and code review

Liaising with stakeholders during problem diagnosis, requirements gathering, detailed level design, development, system test and production implementation to ensure that optimal resolutions were achieved

Reviewing different systems, conducting GAP, feasibility & risk analysis and proposing various profitable options & new systems for the business to senior management

Participating in project planning sessions with project managers, business analysts and team members to analyze business requirements and outline the proposed solution

Working on business and systems analysis methodologies, practices, and artifacts including functional requirements, requirements mapping, requirements traceability matrices and report specifications

Establishing service level agreements with business units & stakeholders; evaluating risk, cost, resource requirements & schedules associated with projects and submitting effective delivery opinions

Reviewing customer solution documents and identifying gaps in products and prioritizing product backlogs, providing incident resolution as per the PFPs (Request for Proposal)/RPIs (Request for Information) received

Performing troubleshooting and debugging the applications; providing post-implementation, application maintenance and enhancement support to the client with regards to the product/ software application

Working as a part of a high-performing Software Testing Team through all phases of application development; ensuring that information systems, products and services met or exceeded organization/industry quality standards and end-user requirements

Conducting Root Cause Analysis (RCA) that analyzed bug patterns and providing insights and practices to the Development Team for prevention of high priority/severity bugs

Designing and developing Automation Framework and performing QA Testing & Maintenance functions basis requirements and automation plan

Establishing and enforcing Standard Test Processes and Deliverables (including defect management and quality metric reporting) within the gated process to streamline testing and support automation and manual testing efforts
