Triumph Systems and Solutions as Software Engineer

Mar 2016 to Jun 2017

Project #2 Mar-2016 To Jun-2017

Title : Automation of Domestic Regulatory Reports(ADF)

Client : ICICI BANK LIMITED

Role : PL/SQL Developer

Technologies : Oracle SQL & PL-SQL, SAS & .Net.

Description:

ICICI Bank Limited is a multinational financial services company and it is India's second largest bank with network of 3,350 branches and 10,486 ATM's in India, and has a presence in 19 countries, including India.

This project is for automation of regulatory reporting of ICICI Banks for countries Singapore, UK, USA, Bahrain, Sri Lanka, Canada, Qatar and Domestic. Basically, report generation is using OFSA database data.

The project involves incorporating foreign branches data and creating a CPR (Central Processing Repository) where all the data is placed after migration of all the databases in target database i.e. OFSA AI.

The project also helps to generate the reports in .xls and XFDF formats using the SAS reporting tool.

The generated reports will be stored in SAS and Life-ray portal for future reference to make intelligent banking decision based on data available in various branches across the globe collected over a period of time.

Responsibilities:

Handled automation of various regulatory reporting of the host regulator of US, Bahrain and Dubai branches involving analysing the BRS, implementation of the module logic and deploying the same in live environment.

Writing technical specifications, as per functional specifications.

Analysed the user requirements

Written SQL queries for inserting, updating and deleting.

Participated in development, coding and various PLSQL validations as per business logic.

Modifying and creating PLSQL procedures, Functions, Packages.

Coordinating with the clients for UAT.

Giving Full support from start to end in returns development.
