## Work Experience

**Tata Consultancy Services Ltd.** as Senior Developer- SAP Fiori, SAP UI5.  
Feb 2017 to Till Date

Job Profile: Currently working as a Full Stack Developer (SAP FIORI and SAP ABAP) Developer. Engaged in designing and developing new SAP FIORI application as well as designing and developing new functionality, enhancing existing functionality and providing support for existing SAP FIORI application.

Project 4: KPMG AR Recharge

Type: Fiori Web Based Application (SAP Fiori, SAP ABAP and OData)

Client: KPMG

Description: This is a Fiori Web application for maintaining time entry for KPMG employees. KPMG has adopted Fiori to migrate from existing WebDynpro application. The custom Fiori Timesheet was a completely new alternative to the IBS Timesheet that was designed keeping in the mind responsiveness, usability and stability. The biggest draw to Fiori was its versatility of its rendering due to which the IBS Timesheet could be accessed from anywhere, whether iPad or Desktop. Developing, designing and delivering new SAP FIORI application

Developing the UI design from as per client requirement  
Gap analysis of the required and developed features with the SAP WEBIDE and SAP GUI and then performing necessary enhancements by developing fragments, dialog box, populating values to table fields that were previously not in consideration, updating values to infotype fields, etc as per requirement

Coordinating with onshore team member

Project 3: KPMG MyTasks

Type: Fiori Web Based Application (SAP Fiori, SAP ABAP)

Client: KPMG

Description: This is a Fiori Web Application that brings together all tasks, notifications, alerts and tracking to review and action from various processes, including Entity & Opportunity, Engagement, Time and Expense and ePayables. The MyTasks Fiori application is based on standard SAP Fiori My Inbox application.

Responsibilities:

- Developing and delivering new features, enhancing existing functionalities in Time and Expense Management module
- Upgrading the UI design from the previous version so as to reduce ergonomic issues
- Gap analysis of the existing web based system with the SAP WEBIDE and SAP GUI and then performing necessary enhancements in Time and Expense Management Application
- Supporting or solving issues raised during QA testing, UAT and after the delivery of the application by developing fragments, dialog box, populating values to table fields that were previously not in consideration, updating values to infotype fields, etc and communicating with the users facing the issue if necessary by arranging a debugging session with users
- Coordinating with onshore team member

Project 2: KPMG Timesheet

Type: Fiori Web Based Application (SAP Fiori, SAP ABAP)

Client: KPMG

Description: This is a Fiori Web application for maintaining time entry for KPMG employees. KPMG has adopted Fiori to migrate from existing WebDynpro application. The custom Fiori Timesheet was a completely new alternative to the IBS Timesheet that was designed keeping in the mind responsiveness, usability and stability. The biggest draw to Fiori was its versatility of its rendering due to which the IBS Timesheet could be accessed from anywhere, whether iPad or Desktop.

Responsibilities:

- Developing and delivering new features, enhancing existing functionalities in Time and Expense Management module
- Upgrading the UI design from the previous version so as to reduce ergonomic issues
- Gap analysis of the existing web based system with the SAP WEBIDE and SAP GUI and then performing necessary enhancements in Time and Expense Management Application
- Supporting or solving issues raised during QA testing, UAT and after the delivery of the application by developing fragments, dialog box, populating values to table fields that were previously not in consideration, updating values to infotype fields, etc and communicating with the users facing the issue if necessary by arranging a debugging session with users
- Coordinating with onshore team member
