Software Engineer with 4 years experience in Front End Development and Automation.

Work Experience

Zycus Infotech as Software Engineer Angular Developer
Jun 2019 to Till Date

Developed and delivered an Epic feature and architected the code and file structure for the same.

Have taken scrum meetings in the absence of our Tech Leads.

Was always given the complex user stories in the sprint and delivered all my stories within the deadline with minimal bugs.

Have developed around 10+ common pipes, directives and components to be reused throughout the product.

Worked on automation scripting using codecept.js for 2 products and refactored the code for entire module.

Have done peer code reviews and taken care of merging of branches in our UI repository.

Have worked on production support and gained immense experience on fixing P2 and P3 tickets.

Tata Consultancy Services as Systems Engineer
Oct 2016 to Sep 2019

Developed 2 main features for Amex product, Capacity planning Dashboard and Environmental matrix portal.

Have contributed in important decision making regarding the design and flow of many features of the application.

Have worked on Collect Script automation (To monitor Network traffic for Windows/ Linux)

Supported Amex applications such as Identity-IQ, Key

Management System, Voltage and also contributed in capacity planning Analysis.
Having knowledge on multiple monitoring tools such as Sitescope, Kibana, Dynatrace, Splunk and Wily.
