Summary

Solution-focused QA tester with 4 years of experience in Performance testing, high-level proficiency with Load Runner and Dynatrace. Web, Web services and True-client protocols using Loadrunner and Performance Monitoring using Dynatrace Monitoring tool, Mobile Application Performance Using Perfetto, seetest tools and have good knowledge of using Soap UI and Postman tools for API testing. Good Experience on Application Performance Management tools. Expertise in end-to-end performance testing of an application. Good Knowledge in programming languages like C, Java.

Work Experience

Capgemini as Associate Consultant Dec 2016 to Till Date

Achievements

Analyzing the bottlenecks and high response times using Dynatrace which contributes to improve the system performance.

Key Projects Handled

Project #1:

Project : Client View Ruby - USA

Client : Royal Bank Of Canada

Tools : LoadRunner, Performance Center, DynaTrace

Protocol : Web (HTTP/HTML)

Period : July 2017 ? Till Date

Team size : 1

Role: Performance Test Analyst

Responsibilities:

Involved in the test plan and requirement gathering.

Responsible for developing the Load Test Plan from the user and business requirements.

Responsible for creating & enhancing load runner scripts to replicate complex business scenarios.

Responsible developing the Load Test Plan from the user and business requirements.

Responsible for Load Testing & Performance Testing.

Designed performance test suites by creating VU test scripts, workload scenarios, setting transactions and inserting them into suites using Load Runner.

Execution of Test Scripts as part of the Performance Test Plan using Load runner.

Validation of scripts using different set of input data, Design and execute multi-user load test scenarios in controller.

Creation of Analysis Reports from Load Test Results using Load runner Analysis Tool.

Using APM tool, Dynatrace for monitoring the application under the load.

Project #2:

Project : Client Mobility

Client : Royal Bank Of Canada

Important

To prevent misuse of candidate information, contact details and attached resume of the candidates have been withheld.

Client : Royal Bank Of Canada
Tools : Load Runner ,Performance Center, Perfecto
Protocol : Web Services (Restful services)
Period : August 2017 ? Till Date
Team size : 1
Role: Performance Test Analyst
Responsibilities:
Involved in various meetings with customers/clients to gather the performance requirements and SLAs before testing
Created Test plan
Participated in regular meetings with developers for reviews and walk-throughs
Created POC (Proof of Concept) for the project
Designed test scripts with custom coding for optimization and enhancement
Test Data Preparation or coordinate with the respective team for data creation for executions
Designed and Executed scenarios for various load conditions
Reviewed & analyzed the results and published the final report after every test with all the issues identified during the performance test executions
Reported on performance degradation/ bottlenecks to the project team and supported to resolve the performance issues
Project #3:
Project : Advisor Mobility Mid tier Application
Client : Royal Bank Of Canada
Tools : Load Runner ,Performance Center, Perfecto
Protocol : Web Services (Soap and Rest Services)
Period : October 2017 ? Till Date
Team size : 1
Role: Performance Test Analyst
Responsibilities:
Involved in various meetings with customers/clients to gather the performance requirements and SLAs before testing
Created Test plan
Participated in regular meetings with developers for reviews and walk-throughs
Created POC (Proof of Concept) for the project
Designed test scripts with custom coding for optimization and enhancement
Test Data Preparation or coordinate with the respective team for data creation for executions
Designed and Executed scenarios for various load conditions
Reviewed & analyzed the results and published the final report after every test with all the issues identified during the performance test executions
Reported on performance degradation/ bottlenecks to the project team and supported to resolve the performance issues
Prepared Signoff document
Created Wiki Document on the project

Projects

Project Title: CV Ruby

Client: Royal Bank of Canada

Nature of Employment: Full Time

Duration: Jan 2017 - Dec 2020

Onsite / Offsite: Onsite

Project Details: We performed both API Performance test and Gui performance test for this application. We had faced so many performance bottlenecks such as DB query taking too much time to execute, GC was taking too much time due to Old heap GC which were tuned post our reporting and analysis and after the performance tuning application started

crashes which were fixed post our reporting and analysis and after the performance tuning application started performing well and response times were below SLA.
