Result-oriented Professional with over 3 years of experience in Software Development,Application Programming,Application Maintenance,Project Management,Requirement Analysis,Solution Architecture,JAVA,Spring,Spring Boot,Java Hibernate,Apache-Tomcat,Kafka,HTML,CSS,C++,MySQL.

Work Experience

Siemens as Software Developer -Java

Jul 2017 to Till Date

Project: FCPQ (Oct 2020- Present)

Future Configure Price Quote is configuring the Gas insulated Switch-gear product and implementing the solution in Tacton based on the customer requirements.

Responsible to develop interface for communication between between Tacton CPQ and Siemens data source.

Closely working with the tacton team members for the implementation of different components of Switch-gear product based on the customer specification.

Project: EnergyIP (July 2017-Sep 2020)

EnergyIP is a Meter Data Management Solution that help in collecting energy usage data obtained from smart meters as part of an effort towards smart grid

Development of new functionalities as per client requirements using technology stack of Java, Spring Boot and Oracle DB.

End-to-end product development, communication with clients and other stakeholders, understanding their requirements, debugging of application in the development environment and collaborated with team members and Project Manager in project planning, designing and development of EnergyIP.

Worked on Kafka messaging system to use it for communication between underlying applications.

Used SonarQube for handling cyclomatic complexities and JUnit to enhance code and branch coverage.
