## Work Experience

**Odessa Technologies** as Module Lead  
Apr 2014 to Till Date

Product Name: LeaseWave

Description : LeaseWave is web based lease and asset management system, handles all aspects of lease and associated assets from inception right up through over-term management and asset disposition. It handles all the required accounting for each lessee and generates invoices, posts payments towards invoices, runs delinquency updates, amortizes income and depreciation and calculates lease termination pay-offs. The system is integrated with workflow transaction which is a dynamically definable system that allows for workflow automation in which control over any decision in any module can be exercised

Responsibilities:

- ? Understanding the business requirements.
- ? Designing the ETL's, SSRS, Tableau Reports based on the Client requirements.
- ? Working with Data Models for automatic report creation with the help of Report Builder.
- ? Involved in converting logical model to physical model with SSIS.
- ? Creating queries based on the logical model to transfer the Transaction data to Analytical data.
- ? Managing database design, creating stored procedure, views and function.
- ? Analysing Performance tuning of database queries, stored procedure and functions.
- ? Attending Client Calls for technical support. Training Client with Report Builder and Data Analytics related queries.
