

**Abhilipsa Priyadarshini**

Software Developer seeking assignments in Software Development, Application Programming, Program Management, Project Management, Requirement Gathering, System Analysis, Gap Analysis, XSLT, HTML, XML, MySQL, SVN, SQL, Python, Unix, RDBMS, JIRA, Agile, Scrum

Current Designation: Software Developer

Total Experience: 4 Year(s) 0 Month(s)

Current Company: Karmick Solutions

Notice Period: 15 Days or less

Current Location: Bengaluru / Bangalore

Highest Degree: M.Tech [Computers]

Pref. Location: Kolkata, Ranchi, Bhubaneswar

Functional Area: IT Software - Application Programming / Maintenance

Role: Software Developer

Industry: IT-Software/Software Services

Marital Status: Married

Key Skills: Software Developer, Software Development, Application Programming, Program Management, Project Management, Requirement Gathering, System Analysis, Gap Analysis, Solution Architecture, XSLT, HTML, XML, MySQL, SVN, SQL, Python, Unix, RDBMS, JIRA, Agile, Scrum

Verified : Phone Number | Email - id

Last Active: 21-Jan-21

Last Modified: 21-Jan-21

## Summary

A dedicated and efficient software developer over 5 years of experience in coding and scripting in python in Django frame work.

Strong knowledge in EDI WTX map development for X12, EDIFACT, XML and CSV formats, AWS with IM, Php.

Both manual and automated testing knowledge in Unix environment (Integration Testing & Volume testing).

Familiar with cloud computing environments and its implementation. Exposure to SQL Queries.

Has worked with Agile methodology and familiar with scrum software development process and JIRA

Has proven ability to work well in a high-pressure environment, completed projects well before the deadlines and delighted the client with my work.

Has coordinated very well with different teams and delivered quality work faster

## Work Experience

**Karmick Solutions** as Software Developer  
Nov 2020 to Till Date

**Karmick Solutions** as Software Developer  
May 2019 to Jul 2019

Programming and software: Python Code development

**IDC Technologies** as Application Support Admin  
Oct 2017 to May 2019

Client- Lupin Ltd.

**Project- Lupin BIOVIA**

Programming and software: Python, BIOVIA Application

**Project Details:**

We integrate the pharmaceutical instruments to a central application BIOVIA. It provides a scientific collaborative environment for advanced biological, chemical and materials experiences. It helps us to develop higher quality medicines faster and more cost effectively

We bring automation in all the laboratory manual work like analyzing, developing and testing of drugs and calibrating instruments

BIOVIA has multiple submodules and in the backend the coding for them are written in Python

Some of the codes are previously provided by BIOVIA we change them whenever requirement comes and for new module or for new instrument we write python codes

We closely work with scientists get the requirement, analyze them and start developing the module through python

Reduce the daily routine practices done by scientists through automation

The project used Continuous Integration and Continuous Delivery(CICD)mechanism

Collaborating with multiple groups (LIMS, ELOG, BIOVIA etc.) for optimized solution

**Responsibility: Technical**

Python coding and Scripting

Develop restful APIs using class based views in Python Django frame work

Section Template Design

Bartender, User Management

Review of new team member's tasks

**Responsibility: Project Related**

Task Prioritization

Weekly Status Report Preparation

Mentoring for New team members and enabling them technically and functionally for project works

Project Management

Developed and maintained implementation documentation.

**Project- Lupin EDI**

Programming and software: EDI WTX 8.3, ANT Script, SVN, Oracle 11g, SQL developer

**Project Details:**

Couple of us who are high performer are chosen to work on EDI project in parallel to BIOVIA project. Here our lead provides us some EDI Map development work where we develop using WTX tool

**Responsibility: Technical**

Requirement Analysis and logical map development by coordinating with client

EDI map development for EDIFACT, X12 and XML using WTX 8.3

Map Deployment through SVN and testing

Unit testing and Integration testing

Map failure Analysis

Review of new team member's tasks

**Responsibility: Project Related**

Weekly Status Report Preparation

Knowledge management by sharing new knowledge share emails to team and maintaining repository for future reference

**Shreshta Info Global Services Pvt Ltd**

Jun 2016 to Oct 2017

**Project- CEVA EDI Logistics**

Programming and software: EDI WTX Map Development, Python

**Project Details:**

Client was a logistics company (CEVA logistics) where we develop and maintain Python codes for small in-house applications

I also developed EDI map development for X12 and XML formats

Directly talk to overseas clients. Get the requirement and work on them

## Education

UG: **B.Sc (Computers)** from **ramadevi womens autonomous college, bhubaneswar** in **2008**

PG: **M.Tech (Computers)** from **Kalinga Institute of Industrial Technology, KIIT Bhubaneswar** in **2016**

**Other Qualifications/Certifications/Programs:**

MCA

## IT Skills

Skill Name	Version	Last Used	Experience
ITX 9.0, IBM WTX 8.3			
SVN, JIRA			
Python, XML/XSLT, HTML, SQL, MySql			
EDI, UNIX, RDBMS			
Agile, SCRUM			
pycharm, visual studio code			
Map Designer			
Windows7, Unix Sun Solaris			

## Languages Known

Language	Proficiency	Read	Write	Speak
English				

## Affirmative Action

Physically Challenged: No

## Work Authorization

Job Type: Permanent

Employment Status: Full time
