## Summary

Result-oriented Professional with over 10 years of experience in Technology Management, Cloud Computing, Requirement Gathering, Application Programming, System Analysis, Project Management, Client Management, Web Development, Agile Methodology, AWS

## Work Experience

• **CloudCover Consultancy Pvt. Ltd** as Head - API, Platform Development  
Feb 2019 to Till Date

### Responsibilities

Part of the Leadership team at CloudCover (STTelemedia funded startup; HQ: Singapore)  
Responsible for Engineering efforts of API and Platform development across all the Business Units of CloudCover: Consulting Services, Solutions & Products

Reporting to CEO & CTO

Managing the P&L, and adhering to the budget [USD 1.5 million] for these Business Units

Design various processes to attract and retain talent

Leading a diverse engineering team of Developers, DevOps Engineers, QA Engineers,

Technical Content Writers [Current team size: 13; will reach 20 by Dec 2020]

Ensuring excellence in execution, quality of delivery, speed and accuracy of engineering

Product Management of CloudCover Media Solution on AWS [Currently in GTM stage]

Provide development & technical leadership for Business Operations (BizOps) product

Work closely with other engineering team in building a DevSecOps platform for BFSI domain

Actively providing support towards ISO 27001, HiTrust certification for CloudCover

### Key Initiatives & Achievements

Hiring the right talent: identifying key roles, designed a feedback driven hiring process

Learning & Development: set up workshops, hackathons and tech talks to upskill team

Numerous initiatives and process improvements to streamline working, changing the

mindset of team to be more organized, increase employee happiness and job satisfaction

Defined & built Business Dashboards for CXOs to provide visibility and bring transparency,

got appreciation from CEO for the resulting product

Achieved consistent >90% rating from my team as manager feedback

Our team delivered, production grade, Telemedicine product from scratch, in under 4 weeks,

which was used for screening COVID patients in camps for Singapore government

Our team is building an open source adapter in collaboration with Google to help anyone

migrate from AWS DynamoDB to GCP Spanner/BigTable; this is result of success in one of our

key projects with one of the largest vernacular social networks in India

Our team has collaborated to create various playbooks: Development Best Practices; Secure

Coding Guidelines, API Automation framework (QA)

• **XpressBees Logistics** as Head of Product Management / Assistant General Manager - Product  
Apr 2016 to Jul 2018

## Important

### Responsibilities

Part of Senior Management team, heading Product Management department  
Lead a 10-member Product team of Product Managers, Assistant Product Managers, Business Analysts  
Reporting to CEO (till April 2017), then into VP - Technology (May 2017 onwards)  
Part of team responsible for Investor relations, providing Product & Technology demos & walkthroughs, SPOC for strategic clients (SnapDeal, ShopClues, Bajaj FinServe)  
Responsible for defining the product roadmap across entire logistics platform (11 Products)  
Leading Product on entire Logistics Platform re-architecture project (ScaleX)

### Key Initiatives

ScaleX project: complete overhaul of the XpressBees logistics platform from scratch, keeping scale in mind, with new, optimized product flows on the Preact-NodeJS-MongoDB stack and with microservices architecture  
Working closely with a Technical Architect for complete CI/CD work-flows (TDD, Git-Codereview, Jenkins, Dockers)  
Key projects: Address Geocoding, Real-time map-based field agent and asset tracking, Automated routing in first & last mile, Dynamic Routing & Cost optimization engine to optimize middle mile, Network Planning & Visualization using Graph theory, Dynamic volume allocation/load balancer engines for allocating volumes  
Product and technical implementation of the Remote Service Centre model - promoting entrepreneurs, enabling a single person to do the complete logistics operations even in remote locations via BYOD android mobile app  
Setup frameworks for requirement evaluation, as business case, this helped to create business level prioritization  
Conducted product development in both SCRUM (agile) & waterfall models  
Spearheaded the strategy and execution of Mobile apps portfolio (Android, Windows CE)  
Unified app (Field Agent) - a BYOD android app to cater to all types of services for first & last mile operations  
Improved product processes to streamline requirement gathering, solutioning and execution  
Regularly visited key clients along with BD team to provide tech & product solutions for client's pain points
