Sep 2014 to Till Date

implementation, Development, Support and Maintenance, Migration and Upgradation of projects in Cisco Applications.  
Requirement and Data Analysis, Reporting, Automation in Service Commerce Area.

Project / Client Name / Location - Supply Chain-Large Scale Service (SCLSS) - Manufacturing /Cisco Systems/Pune

Duration: 01 Years and Months, from Jan-2015 to July-2016

Tools & Technologies - JAVA, J2EE, JMS, Web Services, ORACLE, E2OPEN Gateway, GXS, Layer 7, Remedy 8

Project Profile:

Supply Chain Large Scale Services (SC LSS) is a business-critical initiative comprised of standardized systems and technology that will enable enhanced commercial capabilities for Cisco.

Cisco manufacturing is based on an outsourced contract manufacturing business model where the Manufacturing Partners (MPa) build the products for Cisco and ship to customers based on the configuration or specifications developed by Cisco, or Cisco's customer. Orders are communicated to MPa as a backlog message; it is on this basis that the MPa performs the manufacturing build in their system. The partners also regularly share their view of the supply picture and any changes identified to the expected commitment date for the fulfillment of the order to Cisco systems.

Role: Application Support Engineer

Contribution / Highlights :

As a team member I was actively involved in the below phases of project:

P1-P2 handling and SLA Statistics reporting

Handling incident management, change management, problem management

Monitoring various application components System Logs, JMS message flow and document transmission.

Root cause Analysis and short-term fix implementation
