Summary

Experienced Technology Consultant and a Full Stack Developer with a mind for analysis, strategy, leadership and interest in programming and quality software development.

Work Experience

Pricewaterhouse Coopers Private Limited as Technology Consultant Jul 2017 to Till Date

myTransfer (April,2020 - July,2020)

This application is intended for millions of International Business travelers to know about their taxes, to do lists for moving between different locations worldwide and other compliance related data.

Worked as

sole

developer on this legacy application to incorporate few client specific configurations and changes for onboarding new clients.

Used

C#, .Net

framework at the backend and Aurelia framework at the front end.

Worked fully in Agile Methodology facing US based clients on a daily basis.

Integrated Test Range Automation System Campus Automation System (April, 2020 - Aug, 2020)

The objective of the project was to provide a user-friendly environment with least dependency work to the users of all Divisions or Groups of the Integrated Test Range (ITR) to execute their day to day office work flow.

Worked as a backend developer using

C#, .Net

framework: used Visual Studio, Microsoft SQL Server as the development platform.

Worked on the Promotion module for the project.

Worked in Application Lifecycle Management using TFS and Azure DevOps.

D365 Reusable Component POC (Mar, 2020- May, 2020)

Started learning D365 and MPOS.

Made few custom features for this POC.

myTrips (Oct,2017 - Feb,2020)

This application is intended to increase the global compliance level on immigration and tax activities needed by the millions of International Business travelers.

Worked as full stack developer using

C#, .Net MVC Entity framework

; used Visual Studio, Microsoft SQL Server as the development platform.

Worked fully in

Important

Agile Methodology
facing US and UK based client interactions on a daily basis.
Worked in Application Lifecycle Management using
TFS
and
Azure DevOps

Worked on
Apache Nifi
, introduced workflows and made custom processors to automate end to end processing of travel files which helped in
maintenance process of hundreds of thousands of trips.

Blockchain Technology (Feb,2018 - Dec,2019)
Researched, learned and developed multiple POC's on different platforms like Ethereum, Multichain and R3Corda.
Worked as a back-end developer on a government project on citizen's birth and death registration on
Ethereum platform using
Node.js

Developed a POC using
R3 Corda
on Procure to Pay process for which I was rewarded as well.
Developed a POC on Control framework which is an application to audit any blockchain application underlying
a particular blockchain network w.r.t. different parameters. It was tested on
Ropsten
test network and our local
Ethereum
network.
Made multiple
presentations
on different use cases depicting the current process, its flaws, implementation using blockchain and its advantages
over the current process.
