Work Experience

CITI BANK - CITICORP SERVICES India Private Limited as Application Developer Engineer II -Java
Jul 2017 to Till Date

Back end Java Developer that facilitates trading and Sales of financial products
Direct Interaction with the users and business counterparts with a holistic viewpoint and full ownership of deliveries, evolving as a client-centric solution architect
Served as a DevOps Engineer following test and behaviour driven development of CI/CD deployments in agile projects

KEY DELIVERIES

Developed a REST service which acts as a Gateway through which clients can place Transaction in a secured way with faster throughput when compared to existing channels like TIBCO EMS
Built a distributed zero-latency pricing system in Java for collecting currency price based on market environment
Horizontally scaled legacy gateway services for high availability and reduced service latency by 50% through containerization
NDM service was built to enable file based transactions
Built a dashboard to track the code quality of the java package and ensures code quality is not compromised across release cycles
Built a RECON process which ensures deal financials sent across multiple downstreams remains the same
Converted 24*5.5 running services to run 24*7 thereby providing FX rates and confirmation messages back to client even over weekends
Developed a gRPC interface which acts as Gateway for internal clients and provides throughput 10 times faster than REST service
Pre UAT and Pre PROD environments integrated with regression suite is introduced which ensures UAT and PROD users are not impacted
