Summary

Skilled Java developer and team leader with diverse experience utilizing Java tools for client-server environments and understanding of many programming languages including C, C++, and HTML. Worked with a medium size team of Java developers to maintain and improve company projects. Assisted with disaster recovery environments for critical business applications.

Work Experience

PayTM as Software Developer

Jun 2018 to Till Date

Currently working on Equity Section.

We are building solution for all kind of investors (i.e. small , big) who can come to our platform and trade seamlessly.

My responsibility is to understand the system of other trading platforms like (Zerodha , reliancesmartmoney etc.) and design the solution to fit in Paytm System.

Currently developing FMS (Fund management System) which help user to add/withdrawal money in trade account. After that he use money in trading. Already developed watch-list functionality of users. Worked on REST services and cron .

Incture Technology as Software Developer

Jul 2016 to Jun 2018

Handling java development including code & troubleshooting of applications.

Monitoring service based project progress & outstanding issues and ensuring the quality & timeliness of the deliverable preparing monthly dashboard, project health check metrics and weekly & fortnightly status reports as well as extending post-implementation support to team members by identifying defects, inconsistencies & errors.

Completing product development as per requirements, schedules & activities; contributing to team meetings, handling troubleshooting, and development & production problems across multiple environments/operating platforms.
