Dec 2017 to Till Date

**Open Text** as Associate Software Engineer  
Dec 2017 to Dec 2017

Project: Nestle OT Order Application

Description: Order App is used by retailers to track their orders and how those are being fulfilled by the participating suppliers. The suppliers will send real-time updates to the order processing to OpenText B2B gateway. The app will consolidate the order information. The retailers can view the status of the orders placed with a supplier. They can view where in fulfillment cycle is their order and what changes are happening (in terms of quantity, date of delivery etc.) in real-time. Team size: 14

Responsibilities:

As a Developer, I was involved in communicating with the team and getting inputs for new requirements & involved in project analysis and development of business logic.

Involved in Development of code end to end as per design analysis.

Designing and developing new enhancements

Analysis and fixing of bugs

Unit testing application
