Software Engineer with 4.10 years of experience in SQL, PL/SQL development and enhancement tasks using Oracle 12C/11g databases and UNIX

Challenge to learn new Business Technologies, coordination, Teamwork, adaptability & client interfacing skills.

Work Experience

XORIANT SOLUTIONS PVT LTD as Software Engineer

Aug 2019 to Till Date

Project: CDi application development and enhancement

Clients: BNY MELLON USA, SSBT (State Street Bank), Union Bank of Switzerland (UBS), DATAGX

Position: Consultant (PL/SQL Developer)

CDI application is an application (data handler) for managing ETL of customer assets/securities into the Oracle database with the help of various PLSQL objects. The asset/securities are received as flat files (text/csv) and then loaded into the Oracle database in multiple stages through scheduled automation jobs. The ETL process is capable of handling millions of records for fuzzy and exact match of data. The data typically flows through different stages, namely prestage, diagnostics, transformation, staging and finally matching. Data for these securities/assets is cleansed by Finance and Operation Team for delivery to clients.

Responsibilities

- * Involved in core/critical database development tasks and impact analysis in all directions
- * Optimizing ETL design and incorporating new logics for performance tuning.
- * Troubleshooting dB production issues and debugging UNIX log files when needed.
- * Creation and maintenance of database objects code of CDI and provide technical solution for new features.
- * Migration of database using Import and export utilities.
