## Summary

4.8 years of experience in the Software Development Life Cycle involving requirement gathering, analysis, design, development, testing, implementation, and Production Support. Advanced experience in developing web and Client /Server Applications based on Microsoft .NET Technologies and expertise in implementing N- Tier Architecture.

## Work Experience

### **Huron Consulting Group** as Software Engineer

Jul 2018 to Till Date

Extensive experience working in an Agile development environment. Strong analytical, organizational and interpersonal skills. Excellent verbal and written communication skills.

Identify development issues, brainstorm solutions, and constantly improve the solution via testing and feedback until the issue is

resolved. Worked in close cooperation with project managers and other functional team members to form a team effort in development. Provided programming estimates, identified potential problems, and recommended alternative solutions.

### **Accenture** as Application Development Analyst

Jan 2016 to Jul 2018

Sound knowledge of understanding of object-oriented design and programming. Designed and coded application components in an Agile environment utilizing a test-driven development approach. Excellent verbal and written communication skills. Stayed current on trends, latest industry developments and shared knowledge among colleagues. Collaborated with other members of the product development team.
