## Summary

A competent professional offering 10 years of experience in designing & developing Applications/Software using Microsoft Technologies C#.Net, ASP.Net, ADO.Net, Web API, ASP.Net MVC, jQuery, SQL Server, VSTS (MS AZURE), TFS and JavaScript. Rich experience in managing complete Software Development Lifecycle (SDLC) including requirement analysis, development, coding, design, enhancements, customization, UAT, and other testing Methodologies. Skilled in mapping clients' business requirements and translating these requirements into functional specifications, implementations & custom application solutions using ASP.NET on N-tier & MVC Architecture, C# and .NET Framework. Extensive experience in designing User Interface using JQuery, AJAX, HTML, CSS as well as working on writing Stored Procedures in SQL Server-2012/2014.

## Work Experience

• **RR Donnelley** as Senior Software Consultant -Dot Net  
Apr 2013 to Till Date

### Key Result Areas:

Designing and developing products/applications using Microsoft Technologies including C#.Net, WCF, Angular.js, and Web API following different project execution methodologies  
Participating in scrum meetings, sprint planning & review meetings, sprint retrospective meetings, sprint backlog, story estimation, daily stand-ups, iteration & release planning and reviews  
Spearheading complete SDLC including development, enhancement & stabilization; mapping & analyzing user stories and requirements to devise a robust software solution  
Collaborating with internal teams to produce software design and architecture; reporting progress to Project Manager  
Ensuring defect/bug free applications by conduction Unit & Integration Testing  
Collecting data to support test cases, developing Unit Test Plans for product development; formulating steps to initiate and conducting testing for pre & post implementation  
Executing complete Development Lifecycle with focus on Impact Analysis, Coding, Detailed Design and Development; ensuring timely completion of project and extending support for applications in Local & Distributed Environments  
Directing application Enhancement and Performance Tuning activities  
Identifying & analyzing defects, questionable functions, errors, and inconsistencies in software program functions  
Working on MVC Framework and ADO.Net Entity Model; writing SQL Scripts, Stored procedures and functions Creating Web Forms & Classes using C#.NET which include both N-tier architecture and database connectivity  
Working with multiple product teams in support of ongoing technical development activities  
Gathering & analyzing functional/non-functional requirements, mapping solutions based on the requirements  
Analyzing user needs & application requirements to determine feasibility within time & cost constraints  
Interacting with team members to ensure smooth progress of project work; ensuring adherence to quality norms throughout the implementation process  
Participating in the project activities including project planning, testing, effort, design, scope, estimation, resource coordination and delivery as per specified time frames

• **Blueshift Information System** as Software Engineer
