## Summary

I'm a self-motivated IT professional who believes in the concept of being a Generalist-Specialist, wants to make an impact and help a company grow, upscaling at every step; Currently working as a Senior Software Engineer at Infosys for a multinational financial services client and upskilling as a DataScientist with International Institute of Information Technology Bangalore.

3.5+ years of professional experience in back-end development and testing end to end backend and front-end application.

Excellent creative ability, problem-solving, analytical skills.

Profound knowledge of agile software development methodologies.

Great team player, grooming the team constantly and hard working.

Implemented an end to end Supervised Classification business problem using Machine learning algorithms in a workshop under guidance.

## Work Experience

**Infosys** as Senior System Engineer  
Mar 2017 to Till Date

3.5+ years of experience in Infosys has extensively taught me to Work better in teams, adhere to individual timelines, stay motivated even in the toughest of the times, motivate the team to increase productivity and help them time to time, manage onsite-offsite co-ordination, manage clients and be flexible with agile or waterfall.

Project 1: Adjudication of Health care payments for an American Insurance company.

Project 2: Calculation of risk score of individual customers and companies for an American Credit Card Company.

Parallel skills: Did standup comedy for more than 2.5 years with almost every comedian in the country to finally realize my true calling is to benefit the world through AI.

I try to empathize with everyone, my fearlessness to try anything and my adaptability with different technologies and capacity to grasp as much knowledge about the domain as I can is what makes me a valuable part of all the teams I have worked with.
