Technology: C#, VB.Net and SQL

Responsibilities: To upgrade and maintain the server.

- * To setup and host the application through IIS
- * To develop the enhancements in the application if need arises
- * Involving in stand- up calls for the status updates
- * Studied and tried to migrate TFS server to VSTS.

Project: Trane Intelligent Services -UI development

To provide UI Development and enhancements for the applications of Trane Intelligent Services division of Ingersoll Rand.

Technology: C#, ADO.NET and SQL

Responsibilities: To enhance the already developed functionalities and bug fixing

- * Requirement Gathering and Analysis
- * Identification of Root cause of the bugs
- * Fixing the bugs

- * Environment Testing
- * Unit testing
- * Involving in Client stand- up calls for the status updates
- * Involving in Client Scrum calls for requirement clarifications

Project: IR RS Home Sale Management

To maintain the components delivered to the customer.

Technology: C#, ASP.NET, ADO.NET and SQL

Responsibilities: To test the already developed application and fixing the bug.

- * Requirement Gathering and Analysis
- * Identification of Root cause of the bugs
- * Fixing the bugs

I have undergone four months training in 'Dot Net' technology. I got the chance to learn more about SQL Server and tried to develop sample "Blood Bank Management" application with my team using C# and SQL
