Established Highly Complex Uniper Governance Incident Dashboard with SAP BusinessObjects Dashboards 4.2 and Tableau
 Performed automation of Standalone Source Data (Source: Service Now) before fetching it to the dashboard for reporting
 Led the highly complex front-end development of the 'Uniper Weekly Analytics Dashboard' that included: o Automatic Aggregation of Incident Inflow/Closed/Backlog Count, multiple KPIs e.g. Response SLA (%), Resolution SLA (%), Ageing of Incidents in their respective queue, Pending Incidents per assignment group, & so on
 o Calculating consecutive 6 weeks of data (current week + previous 5 Weeks)
 Deployed multiple change requests as requested by End User during UAT Sign Off
 Development of Multiple Analysis Office reports leveraging prompt, filtering of data, sorting, working with hierarchies
 Published the report output into BO Server with Folder/User Management

• **HP Enterprise** as Application Management Service Delivery BO COE
 Feb 2014 to Oct 2017

Hana Development/Support BO Development/Support BO Administration Highlights:
 Provided complete operations services for BI application management & custom development for clients
 Developed the post implementation go-live support environment, reviewed the transition plan from the project team and supported & maintained the technology infrastructure
 Accomplished complete Front-end BO reporting for APAC region, determined the client needs by selecting & applying appropriate approaches, tools & techniques to assess the client's business Coordinated with Project Managers, Business Analysts and team members to analyze business requirements and outline the proposed solution
 Interacted with Users to know their Business views while gathering the report requirements and provided Several Report Mock-ups to finalize the requirements
 Involved in Incident Management, Change Request Management, Release Management, Break Fix, and Development of various reporting developments using tools such as Web Intelligence, Dashboard Designer, SAP Lumira, Design Studio, SAP Business Objects Analysis for OLAP and SAP HANA
 Involved into Table creation and flat file load into HANA, Data Modelling (Attribute View for Master Data, Analytic view for Transaction Data & Calculation view as final Model in HANA Studio)
 Combined Attribute views using join to the Fact Data to create Analytic View, created Calculation view with multiple calculated attributes and measures for year-over-year data
 Conceptualized, developed & delivered Daily Sales Dashboard with high visibility to APAC Leadership Team (President, Vice Presidents, Directors) tracking daily sales performance o Automated Working Days Calculation (with Current Date function), Dynamic Column/Report Header o Complex Alerts (RAG Status) highlighting discrepancy in data, Input Controls o Complex Scheduling of Daily Sales Dashboard to deliver to APAC Leadership Team
 Monitoring BO Servers running with optimal performance, Verifying Web applications (CMC, Infoview, Custom Applications) availability, Monitoring day to day scheduled report jobs from Instance Manager, Supporting issues for Business users

• **Hewlett Packard Globalsoft** as Solution Architect
 May 2010 to Jan 2014

- * Requirement Gathering, GAP Analysis, Prototyping, preparation & maintenance of HLD, LLD, Universe Design Specification
- * Designed, tested and troubleshoot Business Objects Universes and Reports according to clients requirement
- * Analyzed existing Universe, proposed changes to cope with the requirement, development of Complex Webi Reports
- * Performed testing of Universe structure (tables sync with the database), Aggregate Awareness (correct level of aggregation)
- * Troubleshoot errors like #Multivalue, #Overflow, #Context, # Data sync, # Incompatible at report level
- * Developed various interactive Dashboards using Xcelsius
- * Improved productivity of the BO product by reducing the defects rate
- * Implementation, Project Kick-off, Status Meeting, Production Support, Maintenance.

• **Hewlett Packard Globalsoft** as Senior Developer
 Jan 2008 to May 2010

- * Involved in:
 - o POC, HLD, LLD Preparation
 - o Design & Development of Universe, Crystal reports using SQL, Complex BO and Webi Reports
 - o Development of Dashboards using Xcelsius
- * Created QAAWS and Live Office Connections to pull data from the database to source data excel file
- * Utilized existing components such as Accordion Menu, Play Selector, Menu, URL Button, Ticker, Label Based Menu, Combo, Map, Connection Refresh Button, Query Refresh Button, & so on
- * Used several inbuilt functions from Excel to develop the source data excel sheet for development (COUNTIF, VLOOKUP, ISERROR, FIND, & so on)
- * Created Repository and BIAR files to transport the development into multiple Non-Prod and PROD System
- * Deployment of HP Reporting Solutions to Multiple Customers McCain, MCBC

• **HCL Technologies Limited** as Lead Engineer
 Feb 2005 to Dec 2007

- * Managed the Migration activity from the version 5.1.7 to XIR2
- * Involved in design & modification of the Universe to meet the enhancement in the database and convert the schema from star flake schema to snow flake schema
- * Generated different user interactive reports which supported various business objects features like @prompts, slicing and dicing and some complex filter conditions
 - o Enhancement of some of the reports as per the customer requests like changed from tabular to cross tabular
 - o Newly developed reports included features like new link reports, reports with different levels of filters assigned on them
