Work Experience

● Cognizant Technology Solutions India Ltd as Associate Projects Dec 2013 to Till Date

Projects Undertaken:

Project1

Title: NEMS (National Encounter Management Information System)

Role: Development Team Member

Duration: Since Sep'20

Client Served: Optum

Team Size: 03

Technologies/Tools Used: PL/SQL, Core Java, Oracle SQL Developer, Eclipse

Brief:

- ? Encounter based on claim adjudicated by the source and a record of medical services rendered by a provider to a member enrolled in the MCO on the date of service regardless of payment status (Paid/denied)
- ? MCO are required to submit claim adjudication activity to the state via encounters

Key Result Areas:

- ? Examining requirement and creating design document; enhancing PL/SQL queries according to the requirement
- ? Implementing unit and system testing; concluding the tasks following Agile Methodology as well as attending daily status calls with the Scrum Team

Project 2

Title: EPIMS (Enterprise Pharmacy Information Management System)

Role: L2 & L3 Support Engineer

Period: Jul'16-Aug'20

Client Served: Kaiser Permanente

Team Size: 11

Technologies/Tools Used: Spring MVC, Hibernate, Java Swing, Apache MQ, Soap, Web logic, Dynatrace, Service Now, Putty, WnSCP, IBMHeap and Thread Dump Analyzer, Eclipse, SQL developer, Jira.

Brief:

Important

- Using Free CV Search you have access to featured candidate profiles of Naukri. You can browse through the profiles and email the candidates of your choice directly using the email option provided. To prevent misuse of candidate information, contact details and attached resume of the candidates have been withheld.

- ? Automatic prescription dispensing system in a pharmacy, obtained from doctor electronically and processed at pharmacy
- ? Each prescription follows various steps like Order Entry, Data Entry, Data Verification, Adjudication, Fill, Product Verification and Will Call
- ? Application interacts with several third-party components

Key Result Areas:

- ? Managed high and critical call and restored the application within SLA; performed heap and thread dump analysis, examined long running queries for performance related issues
- ? Coordinated with infrastructure teams to create alerts in Dynatrace and logged in Splunk for repetitive issues as well as collaborated with business and vendor to resolve issues within SLA

Project 3

Title: Distribution Channel Management

Role: JAVA Production Support

Period: Dec?15-Jun?16

Client Served: UHG

Team Size: 02

Technologies/Tools Used: Java, SQL Developer, TWS, HPSM, Oracle Database, Jira (Confluence page

Brief:

- ? Utilized to calculate the commissions for the brokers, from a product perspective MA, PDP, MedSupp transactions were processed in DCM currently
- ? Consumed by the Secure Horizons Contracting, Licensing and Appointments group (CLA) to manage agent on boarding
- ? The GUI allows for the CLA to on-board/maintained agent Demographic, Licensing, Appointments, Background Check, Certification, Agreements (Contracts) and Agent Hierarchical information
