Work Experience

Capgemini as Senior Data Engineer
Mar 2016 to Till Date

Project Name - Global Sourcing Analytics
OIL and GAS Industry- Supply Chain (Procure to Pay)
MARCH 2020 - PRESENT
About Project ?

Global Sourcing Analytics is an oil and gas industry project where we are modeling and standardizing storage of data, coming from all different sources across the globe. This standardization will give eagle eye view to business users to perform required analysis and needful decisions.

Leading functional and technical solutions to drive supply chain business solutions for the oil and gas industry - Procure to Pay Cycle.

Modeling an optimized & normalized STAR schema structure for storing approximately 10TB data in DATALAKE (Greenplum), coming from 9 different ERP sources-ORACLE & SAP.

Converting and structuring raw data from native format to a normalized Facts and Dimensional structure to facilitate efficient MASSIVE PARALLEL Data Processing.

Gathering business requirements from users and interpreting patterns and trends of business insights into information & Dashboards which can offer ways to improve a business, thus affecting business decisions such as spending, profits and growth.
