Projects

Project Title: Chevron CBU D2 implementation

Client: Chevron Oil & Gas

Nature of Employment: Full Time

Duration: May 2019 - Jan 2020

Onsite / Offsite: Offsite

Team Size: 4

Skill Used: Windows and Unix

Project Details: Chevron IMA caters IT implementation to its various internal clients globally. CBU D2 implementation is one of such implementations where D2 based solution is being rolled out to its Canada Business Unit.

CBU has 18 functional groups which uses legacy application to store their Business-related documents and Engineering related drawings. Currently the legacy application is being replaced by D2 which gives more features to the users which enables them to store and organize their critical documents in more efficient and secured manner. It also gives rich user experience in usability perspective.

This implementation also gives the ability for the FE Project and Operations engineers to work on CAD/CAM drawings by using customized concurrent workflow process.

Project Title: Cambridge Asset Management System

Client: Cambridge University Press

Nature of Employment: Full Time

Duration: May 2017 - Till Date

Onsite / Offsite: Offsite

Team Size: 4

Skill Used: Java, J2EE, JSP, Java Script, XML, Eclipse IDE 3.0, Putty, Winscp, Filezilla

Project Details: Cambridge University Press is the publishing business of the University of Cambridge. Press publishes the finest academic and educational writing.

CAMS is a Documentum-based asset store used to archive finished goods, product assets and metadata, their component assets, as well as pre-final work products in various stages of the commissioning process. The CAMS solution is used by licensed members of the Press for archive and visibility into reusable assets. CAMS is also used by suppliers and other third parties (such as Amazon), who access the system for the import or export of CAMS content via password protected FTP folders.

Project Title: GE-Power & Water Collaboration

Client: General Electric

Nature of Employment: Full Time

Duration: Nov 2016 - Apr 2017

Onsite / Offsite: Offsite

Team Size: 6

Skill Used: CRX Repository 2.0, CRXDE Lite, JIRA, Jenkins, maven, GIT, Java / J2EE, JCR API, Apache Sling, JSP, Java script, JQuery

Project Details: Adobe AEM is a world-class Web platform that empowers an integrated digital experience through Web, Mobile, Social Media and Video. GE Power & Water development project is intended for managing the public websites of General Electric.

GE Power & Water is comprised of 4 businesses or P&Ls:

Power Generation Products (PGP) Heavy Duty Gas Turbines, Steam Turbines, Generators, & Controls products & solutions [https://www.gepower.com/]

Power Generation Services (PGS) Aftermarket services and upgrades for Power Generation Products [https://powergen.gepower.com/]

Hitachi Nuclear (GEH) Nuclear reactors, fuels and services [https://nuclear.gepower.com/]

Renewables Wind Turbines, Solar, and Battery Storage [https://www.gerenewableenergy.com/]

A customer dashboard [my.gepower.com] The target audiences are customers who have purchased PGP equipments, nuclear reactors are PGS & Nuclear customers.
