Managing data collection team

■ **H.G. Technologies Ltd.** as Sr. Project Manager-IT Software Development
Mar 2007 to Oct 2018

Growth Path:

Mar'07-Apr'09 Team Lead

May'09-Dec'10 Sr. Project Lead

Jan'11-Dec'13 Project Manager

Jan'14-Oct'18 Sr. Project Manager

PROJECTS:

At H.G. Technologies Ltd.

Project Title: Financial Accounting Solution - Nimble

Client: Around 40 clients in USA

Designation: Scrum Master

Period: Sep'17-Oct'19

Team Size: 12

Environment: ASP.Net MVC 5.0, C#.Net, MS SQL Server 2008 R2, IIS 7.0, Windows 2008 R2, ADO.Net, AJAX, LINQ,

Windows 10 & SSRS Reporting Services

Description:

This is an online accounting software product which is suitable for small and medium sized business corporations.

There are about 10 modules which are user management, invoice, payments and receipts, sales, payroll, funds

transfer, reconciliation and many reports in which some are customizable. Nimble has 2 versions i.e., Staffing and

Property.

Role:

? Managing a wide variety of functions including impact analysis, release planning, status tracking, task efforts

estimation, preparing project plan, team mentoring and daily scrum calls

? Coordinating with the customers, stakeholders, sales and internal SMEs teams and gathering requirements

? Understanding user pain areas and proposing reliable solutions

? Helping Product Owner to prioritize the product backlog items and status updates

? Reviewing high level & low level design documents and wireframe/prototype designs

? Ensuring on-time delivery responsibility of the sprint deliverables

Project Title: Physician Compensation ? Heisenberg II

Client: In-house Product

Designation: Sr. Project Manager

Period: Nov'16-Aug'17

Team Size: 5

Environment: ASP.Net, C#.Net, SQL Server 2008 R2, IIS 7.0, Windows 2008 R2, ADO.Net, Windows 10, SSIS & SSRS

Reporting Services

Description:

Heisenberg II was artificially intelligent, cloud-based software that allowed health systems and physician groups to

ensure compliance, empower transparency and enable validation throughout their physician compensation process. It

delivered the tools needed to manage, evaluate and adjudicate physician compensation plans.

Role:

? Coordinated with the Onsite Team, gathered and analyzed the requirements

? Engaged in the application design, DB design and wireframe designs for key features

? Led the Offshore Team and allocated tasks to the team

Client: In-house Product

Designation: Screen Designing, Coding and Unit Testing as Sr. Software Programmer
Period: Oct'05-Mar'06
Team Size: 3
Environment: VB 6.0, Crystal Reports 4.5 and MS SQL Server 7.1 & Windows 2000
Description:
It was an effective visitor monitoring software package useful for efficient monitoring of any visitor-intensive organization and other front office activities.

• **SYLN Technologies Pvt. Ltd.** as Software Programmer
Feb 2003 to Sep 2005

Managing Application Development Lifecycle right from requirement gathering, analysis, documentation (functional specifications, technical design), coding, project deployments and post-production support
Researching on application acceptance and soliciting feedback from users to make the new & existing applications more user-friendly
Determining operational feasibility by defining the problem, analysing requirements & assessing proposed solutions
Rendering technical support in the design and development of application; assisting in the development of new systems & enhancing existing systems based on customer requirements
Providing information related to software bugs & defects by analysing & summarizing development & service issues
Preparing technical specifications according to business needs; suggesting improvements to existing system designs
Establishing and enforcing Standard Test Processes and Deliverables (including defect management and quality metric reporting) within the gated process to streamline testing and support manual testing efforts
Interacting with team members to ensure smooth progress of project work; ensuring adherence to quality norms throughout the implementation process
Developing software solutions by studying information needs, conferring with users, studying systems flow, data usage, and work processes
Taking part in kick-offs and understanding the project requirements
Reviewing UI requirements as per the target audience and business needs
Highlights:
Took several measures such as continuous feedback from the clients, stakeholders & users, close communication with teams, periodical reviews of deliverables etc., to ensure that software was in line with requirements specified by clients
Played a challenging role to kick start HeisenbergII Project by thorough understanding the client business activities
Dealt with technology readiness & scope creep challenges during the completion of EMS Project by taking quickly learning the required technologies, continuous focus on the deliverables, frequent reviews with the client & so on
