## Summary

Around 4.11 years of experience in IT industry working on different technologies like SSRS, .Net, .Net Core, PL/SQL, Angular. Understanding of design, development and implementation of Model-View-Controller frame works. Experience SQL Server concepts and basic NoSQL DB concepts. Experience in DB Design, DB normalization and writing SQL queries PL/SQL- Stored Procedures, Functions, Triggers, etc. Worked in Scrum, an Agile methodology for software development. Basic knowledge of Hybrid Mobile Development Using IONIC 3 framework. 1+ year experience of AWS development using C#. Customized SSRS to meet latest industry needs.

## Work Experience

**Mphasis** as Software Engineer-IT  
Feb 2016 to Till Date

### Reporting Services

Project : MI Reporting Services  
Client : SSP  
Duration : September 2019 - Till Date  
Technology : SSRS, .Net, .Net Core, SQL, AWS, PowerShell Script.  
Role : Developer

### Responsibilities:

Developed a .net core API which is used to get the details of a particular set of reports based on passed criteria.  
Developed a 'Custom Authentication Extension' for SSRS server to incorporate OAuth using C#. Developed a 'Custom Library' to populate the Data Source details dynamically while SSRS reports execution, using C#. Configured SSRS server to fit project requirement and developed PowerShell script to automate the process for new environments.  
Worked on SSRS reports and refactored them to support the custom libraries.  
This is an Agile project.

### MD DB Services

Project : MD DB Services  
Client : SSP  
Duration : November 2018 - September 2019  
Technology : Angular 4.0, TypeScript, C#, .Net Core, AWS.  
Role : Developer

### Responsibilities:

Developed an error handling portal for MD DB using Angular and .net core. The portal is designed to fetch and display files stored on AWS S3 bucket. The portal also provides means for user to rectify the errors, if any, raised by MB. The aim was to provide a better user-friendly way to view and rectify errors.

## Important

- Using Free CV Search you have access to featured candidate profiles of Naukri. You can browse through the profiles and email the candidates of your choice directly using the email option provided. To prevent misuse of candidate information, contact details and attached resume of the candidates have been withheld.

The aim was to provide a better user friendly way to view and rectify errors.  
Developed a console app that processes DB data to generate some files in a scheduled manner.

Travel Guard  
Project : Travel Guard  
Client : AIG  
Duration : April 2017 - November 2018  
Technology : SSRS, .Net, C#, Angular 4.0, SQL, IONIC  
Role : Developer

Responsibilities:  
Working closely with Business teams on aligning business requirements with technical ones.  
Worked in a Team to develop a C# engine that takes SOAP request from the client-side application, processes the information and generates an XML response.  
Worked on a POC to replicate existing application and its Functionalities into an Angular 4 application and an IONIC hybrid App.  
Maintaining DB data as per the requirement of the project.  
Developed new reports using SSRS and migrated existing reports from Docucorp to SSRS.

Duck Creek  
Project Name : Duck Creek  
Client : AIG  
Duration : January 2017 - March 2017  
Technology : Duck Creek  
Role : Developer

Responsibilities:  
Understanding and analysing the requirements given by the client.  
Development of Pages, Forms and Fields for an Underwriting Application using Duck Creek Tool.  
Using HTML/CSS on top of Duck Creek Pages for getting desired output as discussed with client.  
Designing Email-Templates, to be triggered from application to the end-user as a confirmation mail.  
Submitting Daily Reports to client (Agile).  
Requirement gathering technical and functional business process.  
Developing single page application which interacts through Rest calls.  
Developing the business logic to set privileges & preferences and send/receive data on server.  
Involved in Delivering projects on time.

CITRIX Migration  
Project : CITRIX Migration  
Client : AIG  
Duration : May 2016 - December 2016  
Technology : HTML, CSS, JavaScript, C#, MVC, ASP.Net  
Role : Development and Testing

Responsibilities:  
Implemented UI design using HTML and CSS.  
Migrated Cart, Checkout and payment gateway functionalities.  
Designed and built signup and login pages using HTML O-AUTH and used Parse to save user information.
