Project Title: FIAT replatforming

Client: Fiat Chrysler Automobiles (Italy)

Nature of Employment: Full Time

Role: Other

Duration: Oct 2015 - Jan 2017

Onsite / Offsite: Offsite

Skill Used: Environment: Oracle 11g PL/SQL, UNIX, SQL-developer

Role Description: PL/SQL Developer

Project Details: Fiat Chrysler Automobiles also known as FCA, is an Italian-controlled Dutch multinational corporation and currently the worlds seventh-largest auto maker.

It is Purely code migration project. Almost 10,000+ Objects are to be migrated from Oracle 10g to 12c.using PL/SQL keeping the logic intact and then on top of that data stage jobs will be designed to trigger them. Testing is also a part of it.

One of the key contributor for the project in terms of delivery. My responsibility is to gather Requirement, Analyze, Estimate, Lead PLSQL developers, Prepare & Run Test case, Review/Bug fix.

Also our team need to migrate the OWB packages to PL/SQL packages and review them. After the newly built packages are compiled in the DB, those are tested and cross checked with the data migrated through the old mapping.

My responsibility also includes, checking of codes built by the other resources and provide them guidance for the issues that comes during build and testing.
