## Work Experience

### Genpact - Quale infotech as Rpa Consultant

Jul 2019 to Till Date

RPA DEVELOPER-basically responsible for understanding business processes and developing automation project for it Expertise with RPA tools such as Ui Path, Automation Anywhere and automation techniques used for web scraping, information extraction etc; Expertise in SQL, relational database and application development; Experience in trouble shooting issues and bug fixing.

Successfully acquired UiPath RPA Developer Advanced Certification from UiPath Academy and Automation Anywhere Certified Advanced RPA Professional (v11) from Automation Anywhere Academy.

Implemented quick solutions for RPA projects for more than 10 processes

Designed & developed automation framework using UiPath automation tool to automate a critical business process for recruitment team at Compunnel Staffing resulting in up to 25% reduction in manual efforts.

Designed & developed automation framework using UiPath automation tool to automate a critical business process for Operations team at Genpact resulting in up to 85% reduction in manual efforts.

Expertise in Core Python, Python Libraries - Pandas, Numpy, Visualizations etc. Currently pursuing a course in Machine Learning and Deep Learning Deployment.

Expertise in Ui Path Orchestrator Process Scheduling, Queues Creation, Bot Development, Project Monitoring, Storing and Retrieval of Credentials Using Assets, documentation, debugging, testing, implementation etc.

Secured a place among the top 5 teams in the Smart India Hackathon 2018, Chennai (A National Level Event) organized by the Government of India for Project Rakshak, an android application built for reducing wildlife-human conflicts.

Well versed in the Object Oriented Programming Concepts (OOPS) such as Abstraction, Inheritance etc. Strong Computer Science fundamentals in Data structures, Algorithms and Complexity analysis.

This process has been selected for RPA as part of a larger project initiative conducted within Kennametal group. Journal Upload is basically .A journal is a detailed account that records all the financial transactions of a business, to be used for future reconciling of and transfer to other official accounting records, such as the general ledger

Different specimen of Journal Templates belonging to Europe and North America Region are received by the Operations team. Data from these JE's containing multiple sheets are extracted by the bot and processed into SAP FB50 screen.

Also, details corresponding to GL item in JE like Tax Code, Company Code, Regions, and Company Name etc are extracted from support sheets and put into SAP page for each GL Item. For a Successful case, a document Number will be generated which is pasted into JE which is further attached to SAP FB03 Page and then moved to target folder. For rest cases bot will update the JE with exception message, screenshot and moved to target folder. Mail will be sent to Bot Owners and Bot Performance Tracker will be updated with transaction details. At the end of the process bot will segregate the Bot Performance Tracker data on basis of region and send a summary mail to targeted region Bot Owners. Analyzed the entire business process and documented integrations to identify manual touch points across the entire process.

End to End Development with integration phase and SIT.

Designing and applying appropriate project management standards and managing the production for the required deliverables

Genpact India Pvt Ltd

Invoice Processing (RPA-UiPath) This process has been selected for RPA as part of a larger project initiative conducted within Kennametal group. Invoice processing is the entire process your company's accounts payable team uses to handle supplier invoices. It starts when you receive an invoice and finishes when payment has been made and recorded in the general ledger.
