Summary

A self-driven, ambitious polymath who is interested in developing great products and able to grasp nitty-gritty of the projects quickly. Experienced in Business Analysis, Project Management and Software Development. I have successfully managed various projects for international organizations by acting as a SPOC to the client and managing cross functional teams.

Work Experience

■ Fingent as Project Co-ordinator & Business Analyst -IT Mar 2020 to Till Date

Act as a single point of contact (SPOC) to the Client to discuss features required for the product
Provide guidance and support to the client in taking suitable decisions considering the long term factors of business and growth into account.
Create wireframes based on the discussed and finalized features.
Provide guidance to stakeholders (Designers, Developers and Testers)
Working across cross functional team including Pre-sales team to manage the project
Create prototypes from the Mockups designed by the UI team
Create user stories and project plan for the projects
Compile timely, comprehensive and accurate documentation and or reports as requested by senior management
Projects handled:
IAOB Project Management tool: A project management tool for the IAOB (International Automotive Oversight Bureau) that was designed and developed from scratch to satisfy their custom requirements which will be used to manage their internal and global initiatives in a much organized manner.
NFPA Assessment tool: A custom assessment tool for NFPA (National Fire Protection Association) that will be used by community users and test administrators. The assessment tool will provide a standard framework to understand strengths and limitations of existing fire safety protocols and practices of a community for the test administrators and community users alike.

■ Orion Business Innovation as Software Engineer (Team lead) Feb 2015 to Feb 2020

Have successfully headed the development more than two projects which is
