Work Experience

Tata Consultancy Services (TCS) as DevOps & Build and Release Engineer

Jul 2016 to Till Date

Working in a fast-paced agile environment, providing updates in daily huddles and POD meetings to Scrum Master & Product Owner as a single point of contact to the client from the production team. Created user stories for various Release lines and working through them during various stages such as grooming, design, development, test, control, and release planning until it is done and accepted. Establish the continuous integration (CI) pipeline to fully automate the build and deployment of our highly available, mission critical cloud platform that supports all Alcatel Lucent products and services. Working Knowledge of Using AWS Linux OS and Linux command. Creating Jenkins job to deploy built WAR files from staging environment to QA environment. Developed Ansible Playbooks files to deploy WAR files to different environments in parallel. Built custom Docker image from scratch with all the required dependencies and integrated with ansible playbook. Creating the branches for the development team to putback their source code, compiling the environment and delivering the generated binaries to the validation team through scripts for Quality Assurance(QA) of the code. Merging the source codes of various Release Lines based on the requirement from the Technical Release Managers using the Mercurial Tool.

Creating the Branches, Tags and Static and Dynamic Environment for developers and support teams to put back their code.

Automation of Code Build and Code deployments using CI/CD pipelines.

Migration of Large scale applications from Solaris to Linux and cross platforms

Developed the webpage Meeting Room Booking using PHP, HTML, CSS and using MySQL as a database

Developed a webpage CRMS INFO TOOL which will the users to get the old CR info from JIRA.

Developed a Tool LAFT ((Large File Transfer) which will help the users to transfer the large file from one server to another using JSP (Java Server Pages).

Developed Infracom Web Page using JIRA REST-API extraction the data of the CR's with Python and designed an optimized UI with Django framework .
