Work Experience

Cognizant Technology Solution India Ltd. as Principal Infra Developer, Automation Consultant - Cognizant Infra Services
Sep 2013 to Jun 2020

Growth Path:

Sep'13 to Dec'14: Associate Consulting Manager - Clorox HP AppPulse Deployment (Cognizant Technology Solution India Ltd. (Domain: APM, HP AppPulse - Performance Anywhere))

Feb'15 to Aug'18: Principal Infra Developer, Cognizant Infra Services (Cognizant Technology Solution India Ltd. (Domain: HP UCMDB Design, Implementation Integration Orchestration & Solution Delivery))

Sep'18 to Mar'19: Principal Infra Developer, Cognizant Infra Services (Cognizant Technology Solution India Ltd., USA), Domain: Microfocus UCMDB, Microfocus Asset Manager, ServiceNow integration

Jun'19 to Jun'20: Principal Infra Developer, Automation Consultant - Cognizant Infra Services (Domain: BMC Atrium Orchestration platform 7.9 Application Lifecycle Management - ALM)

Role:

Developed & executed high-level solution & technical architecture strategies, made high-stakes decisions and overcoming complex business challenges using experience-backed judgment, strong work ethics and impeccable integrity.

Established and implemented architectural framework; ascertaining best practices for coding, architecture & security are employed; ensuring all solutions are scalable, extensible & available from architecture stand point; with technical integrity of project deliverables.

Created and sustained a dynamic environment that fosters the development opportunities and motivates the high performance amongst the team members.

Collaborated with stakeholders while keeping them informed of progress and issues in order to manage expectations on all requirements and deliverables.

Worked on project baselines and controlled the same with respect to cost, resource deployment, time over-runs and quality compliance to ensure satisfactory execution of projects.

Engaged in architecting, designing & developing Enterprise solutions while maintaining scalability, performance, availability and quality of all platforms
Created architectures and designs for new solutions around existing and new problem spaces; acting as Lead Architect taking solution ownership and stimulate design to completion
Facilitated:
Automation use case deployment through BMC Atrium Orchestrator 7.9 platform
ServiceNow asset discovery
UCMDB and ServiceNow integration
Monitored:
Solution design, deployment operations and maintenance of Microfocus (former HP) uCMDB version 10.22 and 10.33 and currently 11.00 in review
CMS Solution design and deployment of UCDMB suite as per client requirement and maintaining multiple environments including Production, Development and UAT
UCMDB administration work like applying regular content packs released by Microfocus, vendor case management, user administration and role-based access creation, single sign on integration. Creation of standard operating procedure documents and user guides as per end user requirements. Documenting all upgrade procedures for internal reference.
UCMDB browser deployment and administrating access while creating application service models
Population of the Configuration Management System, including discovery and other data import methods
Contributed towards applying and administrating version upgrades to UCMDB Prod, Dev and UAT environments
Worked on:
UCMDB discovery data reconciliation and creation of enrichment rules for discovery data refinement
Design work for CI discovery and other data import methods
Technical documentation of the CMDB
Developing and maintaining the uCMDB Discovery including agents and scanners
Designed and developed integration adapters with other Microfocus and third party tools through standard adapters and REST API integrations
Developed and deployed integrations to the uCMDB including adapters to HPAM and HPSM as well as custom integrations including REST API integration with third party tools like V-Realize for automated VM creations and subsequent CI entries in UCMDB, while working on discovery data reconciliation
Ascertained regular housekeeping of the CMDB environments
