Summary

Currently working as Technical Consultant with Capgemini. Responsible for analysing data trends & patterns, backtracking issues, fixing bugs in reporting applications and decisions in CAB meetings. Developed various automation tools to reduce efforts and increase productivity. Experience in Agile life cycle model and strong understanding of SQL.

Work Experience

Capgemini as Consultant - IT (Immediate Joiner)

Aug 2016 to Till Date

Currently working on DataStage for ETL, Teradata SQL, Bash/Ksh scripting, Python web development using Flask and Javascript.

Responsible for identifying the root cause of data issues within the report and fixing them. Fixing bugs with code change as per Agile process.

Involved in weekly Scrum meetings, CAB meetings as a key decision maker.

Developing various tools to automate tasks using Python, Bash scripting, VBA and other technologies used by client and many teams to reduce human errors and increase productivity.

Developed Impact Analyser application which analysed flow of data inside 4000+ SQL objects and showed it visually. This significantly decreased time taken to backtrack any data issue.
