Summary

Certified Full Stack Developer(MERN) with a vast array knowledge in front-end and back-end languages, responsive frameworks, databases and best code practices. My objective is simply to be the best developer, that I can be and to contribute to the technology in the industry all that I know and can do.

Work Experience

Synergenie Solutions as Software Engineer
Jan 2020 to Till Date

Working as a Full Stack developer. Handled multiple projects such as Feedback web app, FasTag web app, FastTag Backend. Involved deeply into spec analysis, design, development & deployment, etc.

Project Title: Feedback System (Web Application)

Description: Feedback System is a web application in which the user can add, customize, create their specific product review(feedback). Users will be able to view the total numbers of the feedback given by the Product Reviewers in a simple but intuitive UI Dashboard.

Tech Stack:

- * Backend - Used Serverless System FaunaDB to communicate with api and database.
- * Frontend - Developed using ReactJS, react Hooks, nextJS, Tailwind CSS.

Responsibilities:

- * Designing and development of Reusable React Components.
- * Development & Maintenance of the FaunaDB Database.
- * Understand product requirements as per specifications.
- * Enhanced existing features in an application using an agile.

Project Title: FASTag Application Web app

Description: FASTag is a simple to use, reloadable tag which enables automatic deduction of toll charges and lets you pass through the toll plaza without stopping for the cash transaction.

Tech Stack:

- * Backend - Developed-on top of Node.js, Express.js & PostgreSQL.
- * Frontend - Developed using ReactJS, React-Admin, react-Hooks-Form, Tailwind CSS.

Responsibilities:

- * Managing PostgreSQL & storing required data.
- * Developing APIs using ExpressJs.
- * Implemented token-based authentication for users to sign in/ sign out of the app.
- * Working on backend built on top of NodeJS and ExpressJs.
