#### ● **Camelot Property Management** as Project Architect and Project Manager Jan 2010 to Jun 2010

Role: Project Architect and Project Manager. (Analyst Programmer, Conducted interview of candidates, trained them in C#, ASP .NET and SQL server)

Project Synopsis:

Camelot Property management has branches all over the Europe. This company manages properties and takes care of them by placing guardians in the property. I am implementing intranet website of this company. I was working for this company in UK and now arrived in India and working for them from India. As a part of growing IT team, I have recruited 2 candidates and trained them on Microsoft technologies such as C#, ASP .NET and SQL server.

Responsibilities:

- \* Analysis of the requirements.
- \* Design the solution so that there will be minimum changes in the current system and new design can easily accommodate future enhancements.
- \* Front end design using HTML, ASP .NET, CSS, JQuery.
- \* Back end coding using C#,Linq
- \* Writing store procedures and UDF in SQL server 2008.
- \* Unit testing and deployment on test server.
- \* Shortlisting candidates, Interviewing and Training them.
- \* Encouraging them for Microsoft certification exams.
- \* Assigning tasks to new candidates, helping them in design, implementation and deployment.
- \* Taken candidates to Onsite for 2 months in London. Handled responsibilities of their Visa processing etc.

Technologies Used: VS2008, SQL server 2008, Dynamsoft SCMAnywhere Hosted Client for source control.SSRs

#### ● **Capgemini** as Analyst Programmer Aug 2009 to Dec 2009

Project Synopsis:

Capgemini is software consulting company with more than 80,000 employees all over the world. It is a Learning Skill Counsel's (LSC) project for UK government. It consists of Microsoft Content Management Server (MCMS) to work with all LSC websites along with CAS. This site provides online courses as well as job assistance with all types of job profiles. My role was quite unique in this project because I was replaced with one contractor and senior developer. Also one Team lead was only 25% on this project. So I was handling responsibilities of Team lead as well as senior and junior developer. I was responsible for complete project life cycle.

Responsibilities:

- \* Analysis of the specifications provided by the clients.
- \* Implemented change request using MCMS API, Web form, C#, ASP .NET
- \* Implemented WCF service which is acting as a wrapper for third party search engine called Coveo.
- \* Development and enhancement of the project using Agile methodology
- \* Functional testing on different web browsers and creating MSI.
- \* Code check in, creating labels and creating hand over to deployment document.
- \* Helping deployment team in installing components on server.
- \* Interacting with testing team to complete SIT, UAT and LIVE.
- \* Analysing defects and solving them quickly so that we can proceed to the next phase.

Technologies Used: MCMS, CCS, ASP,C# .Net 3.5 and .NET 3.0, SQL Server 2008, Windows platform, Visual Studio 2008, WCF, Clearcase, ClearQuest.
