Expert in Global MDM deployment for various clients
Operated as Market Analyst for driving global implementation for designing templates and processes at each stage of software lifecycle
Dealt with the successful execution of GxP compliant projects

Projects Executed
GSK Clinical Development
Description: Playing the role as offshore technical expert to provide the solution for Reference Data Management and Clinical Reference database. EBX has been used to implement the solution.
Astra Zeneca Global Implementation Lead
Description: Implementing Customer MDM for more than 100+ countries on Reltio platform along with AWS, HIVE and INFAPC. Worked from UK as a Techno-functional expert as well as delivery manager. Design the solution on Reltio to accommodate the data migration from legacy Informatica platform. Interacted with client IT and Business/ Market users in order to enhance the requirements in the legacy system.
Astra Zeneca Global Support Lead
Description: Supporting 100+ countries implemented on INFASuit (INFAMDM and INFAPC). Played role of Onsite techno-functional Expert (UK). My biggest challenge was to provide solution to the country specific data related problem and addressing performance bottleneck of the platform. Interacted with client network and IT Team as well Informatica support team to enhance the performance.
Astra Zeneca Market Analysts Lead for Global Implementation
Description: Onsite Lead Market Analyst (UK), primarily responsible of interacting with Market representatives for 100+ countries to understand data issues and business requirements. Build processes & templates to optimize the requirement gathering process, country deployment and facilitate the integration with enterprise specific sources for each country.
