## Summary

Good understanding of the SDLC process - Development, Documentation and review.  
Involved in development of Automation utilities.  
Expertise in developing automation solutions using Java and Python.

## Work Experience

**Wipro Limited** as Project Engineer - Software Development  
May 2019 to Till Date

Role: Project Engineer (May 2019 ? Till Now)

Company Name: Wipro Technologies

Responsibilities: To develop automation software for the given problems statements without using any third party tools and to provide hassle free experience to customer/user.

### Projects

Project Name: Automation for Oracle ERP

Role: Project Engineer

Environment: Windows, Linux

Tools: Sikuli, Java, Python

Description: Oracle EBS has multiple modules like SCN, HCM, Finance etc. Migration from other ERP systems to EBS takes lot of time as the setup data has thousands of records. A custom tool has been developed using Java and Sikuli framework which uses image recognition and uploads the data into the ERP without any manual intervention (RPA Based).

### Roles and Responsibilities:

1. Responsible for conducting Customer demos on various automation solutions developed and deploying perfect solution based on customer requirement.
2. Performed requirement feasibility analysis and identified end-end and possible scenarios suitable for automation.
3. Contributed to the development and deployment of Automated solutions in customer environment.
4. Responsible for automating Incidents and SR being raised by customer to meet SLA.
5. Responsible for getting Customer Reference and Customer Satisfaction on Automation solutions provided which

saved Manual Hours and produced cost savings.

Project Name: Automation for JDE  
Role: Project Engineer  
Environment: Windows 10, Web application  
Tools: JAVA, Apache, MSSQL, Oracle SQL, IBM DB2  
Description: JDE has multiple modules like SCN, HCM, Finance etc. Information of Order status and order movement to be fetched from these modules takes lot of time and effort. To minimize this effort taken by end user to fetch the details from the ERP, we have provided a custom Java based solution which fetches the data from ERP Tables and display the data in meaningful format to the end user.

- Roles and Responsibilities:
1. Responsible for conducting Customer demos on various automation solutions developed and deploying perfect solution based on customer requirement.
  2. Performed requirement feasibility analysis and identified end-end and possible scenarios suitable for automation.
  3. Contributed to the development and deployment of Automated solutions in customer environment.
  4. Responsible for automating Incidents and SR being raised by customer to meet SLA.
  5. Responsible for getting Customer Reference and Customer Satisfaction on Automation solutions provided which saved Manual Hours and produced cost savings.

## Education

UG: **B.Tech/B.E. (CSE)** from **K L University** in **2019**

## IT Skills

Skill Name	Version	Last Used	Experience
C, JAVA, Python			
MSSQL, Oracle SQL			
MS Office, MS Excel, Power point			

## Languages Known

Language	Proficiency	Read	Write	Speak
English				
telugu				

## Affirmative Action

Category: General  
Physically Challenged: No

## Work Authorization

Job Type: Permanent  
Employment Status: Full time
