Summary

Highly analytical and solutions-driven business consultant with over 5 years of experience in business analysis along with in-depth knowledge of business processes in IT and Banking industries. A thorough understanding of the Software Development Life Cycle (SDLC) including but not limited to the various concepts such as Requirement Gathering, Experience in development of Client-server and Web-based applications. Seeking opportunities to utilize analytical and methodical skills and expertise to help companies achieve business goals while striving to leverage my skills and knowledge.

Work Experience

■ **Digite Infotech** as Senior Business Consultant
Dec 2015 to Till Date

During my tenure of over 5 years I have been part of and handled many project implementations for various clients like Infosys,

Santander Bank, Cognizant, BirlaSoft, LNT Infotech and Subex. An insight to my roles and responsibilities are listed below:

-Understand and Analyze client's business requirements and processes through document analysis and workflow analysis, identify gaps and risks in functionality to create new technical solutions and customizations in use cases that support functional requirements.

-Collaborate with clients and stakeholders to prioritize business needs and establish accurate timelines for implementation.

-Expertise in designing reports and dashboards based on the business requirement.

-Work closely with the internal support and development teams to decompose technical problems and implementation of technical solutions, assist in establishing timelines and estimates to resolve issues and develop user acceptance testing specifications. Coordinating between the different stakeholders so that the requirements are solutionized accurately and thus delivered seamlessly.

-Configure and present live product demos, create knowledgeable resources like presentations and use-cases to meet customer needs for pre-sales discussions, collaborate with marketing team to emphasize on marketing collaterals. Develop Proof-of-Concepts with customer executives to demonstrate product's capabilities and features.

-Frequent use of SQL and Tableau for manipulating, validating and demonstrating useful data.
