Work Experience

BNYMellon Technology India as Group Manager, Application Development and Delivery
Jul 2001 to Till Date

Integrated Wealth Experience - Next Gen Portal 2018 - 2019

Redesigned our professional brokerage platform to provide a unified and integrated experience to wealth management investors.

Architected next generation portal framework using Angular7, RxJs, Node

RESTful services deployed as Spring Boot micro services using Docker containers in private cloud

Architected model for exposing business features as Angular feature modules with ability to perform federated builds and deployments

Achieved improved time to market, high performing and resilient web application

Integration Strategy for Enterprise 2019 - Present

With integration becoming a critical part of financial services, we are developing technology that will help speed up our integration with our clients

Tighter integration of features with clients to provide improved user experience

Designed and implemented integration strategy using Angular 7 / Elements with ability to operate in any client environment

Collaborate with our strategic clients on delivering the best experience to users

Service Discovery / Gateway Service 2018 - 2019

Enterprise gateway service to route REST endpoints to microservices.

Provided architecture to find and route to services deployed in private cloud. Helped overcome shortcomings with Traefik

Service registered and discovered via Consul. Service routing and load balancing done using spring Ribbon Client

Strategic Initiatives 2001 - Present

Architected and provided governance for the below strategic initiatives -

Site Builder - Turnkey solution for clients to build / customize websites. Greatly improved turn around time to rollout new websites.

Architected white label solution for portals using StoreFront, Crafter CMS, SASS

Content Delivery Network - In-house CDN to host and deploy static artifacts with caching ability. 30% improvement in page load time
