Work Experience

Zyclyx Consulting Services Pvt.Ltd as RPA-Ulpath Developer

Mar 2019 to Till Date

Title : Billing Order Sell To STC.

Client : Saudi telecom company, Saudi-Arabia.

Environment : Ulpath,Company Internal tools.

TeamSize : 3

Description:

The robot will receive an e-mail with Bill info, take the required info and fill in an ERP sheet to be uploaded to the ERP System, uploads the bill (PDF file) to the system, uploads the ERP sheet to the ERP system, do some calculations and validations then apply these calculations to the latest version for the bill on the ERP System.

Roles & Responsibilities:

Implement Ulpath process solutions in accordance with standard Ulpath design principles and conventions.

Identifying and communicating the technical implementation requirements and configuring new Ulpath processes and activities.

Creating and maintaining solutions and other relevant documentations e.g. PDD, SDD and etc.
Supporting the Operational Teams during the UAT and rollout.
Title : Network Billing Order Process.
Client : Saudi telecom company, Saudi-Arabia.
Environment : Ulpath,Company Internal tools.
TeamSize : 3
Description:
As the process has multiple and different triggers and these triggers are independent from each other, the robot will be set to work in cycles (waves). Within each cycle, the robot will check newly received E-mails and files and will update the queue and sends notifications accordingly. Once the queue is updated with the new jobs? details, the robot will check the jobs? pre- requisites if they are ready to be submitted. At the end, the robot will create related folders (as the required CD structure) and will place the related templates and files in their respective location/folder.
Roles & Responsibilities:
Develop the object and workflow for client Requirement.
Analyzing the problems and implement the processes to improve.
Supporting existing process if there are any changes in development process.
Managing and investigating exceptions (Business and System Exceptions).
Attend scrum meetings.

Project #3:
Title : Off The Shelf Process.
Client : Saudi telecom company, Saudi-Arabia.
Environment : Ulpath,Company Internal tools.
TeamSize : 2
Description:
The robot will start working at the prescheduled time andextracting an excel sheet ?Due List Report?, then the robot should copy all Order Numbers and add it to its queue to work on it, after invoice generation the robot should fetch the invoice number, update the daily report with, and then send a confirmation email to business team.
Roles & Responsibilities:
Develop the object and workflow for client Requirement.
Analyzing the problems and implement the processes to improve.
Supporting existing process if there are any changes in development process.
Managing and investigating exceptions (Business and System Exceptions).
Attend scrum meetings.

Project #4:
Title : Invoice Generation Process
Client : Saudi telecom company, Saudi-Arabia.
Environment : Ulpath,Company Internal tools.
TeamSize : 2
Description:
The robot will start working at the prescheduled time and providing the project bills with the below mentioned sequence in the screen shots. After finishing bill generation over desktop ERP system, the robot should get the invoice number from web ERP System. By the end of each bill generation request the robot will notify the operation team that the bill is generated via email with Invoice Number.
Roles & Responsibilities:
Develop the object and workflow for client Requirement.
Analyzing the problems and implement the processes to improve.
Supporting existing process if there are any changes in development process.
Managing and investigating exceptions (Business and System Exceptions).
Attend scrum meetings.
