Engineer seeking roles in Software Development, Robotics Process Automation, Project Management, Requirement Analysis, Solution Architecture, UiPath, Blue

Prism, Automation Anywhere, MS SQL

Server, MySQL, C, C++, Java, Python, VB. NET, ASP. NET, HTML5, CSS3

Current Designation: Engineer -RPA Total Experience: 4 Year(s) 8 Month(s)

Current Company: TCS Notice Period: 15 Days or less

Current Location: Bengaluru / Bangalore Highest Degree: B.Tech/B.E. [Electrical]

Pref. Location: Bengaluru / Bangalore, Hyderabad

Functional Area: IT Software - Application Programming /

Maintenance

Role: Software Developer

Industry: IT-Software/Software Services

Marital Status: Single/unmarried

Key Skills: Engineer, Software Developer, Software Development, Robotics Process Automation, Project Management, Requirement Analysis, Solution Architecture, UiPath, Blue Prism, Automation Anywhere, MS SQL

Server, MySQL, C, C++, Java, Python, VB. NET, ASP. NET, HTML5, CSS3

Last Active: 21-Jan-21 Last Modified: 21-Jan-21

Summary

I have 4.8 years of IT experience in Robotic Process Automation (RPA) implementations using UiPath. I have been working extensively within UiPath. My passion lies within optimization and innovation with primary focus and interest in building any RPA bots or code that provides optimization and improve end customer experience.

Work Experience

TCS as Engineer -RPA Apr 2016 to Apr 2016

Project Experience

Responsibilities:

Partner with Business Analysts, RPA technical analysts & solution architects to assist with solution design.

Design, build and configure UiPath workflows and Sequences to meet business process and application requirements Configure robotics processes and objects using core workflow principles in an efficient way; ensure they are easily maintainable and easy to understand.

Coordinate with process owners and business to understand the as-is process and design the automation process flow. Providing a superior level of experience and knowledge of the associated methodology to support colleagues through all phases of delivery life cycle

Maintain proper documentation for the solutions, test procedures and scenarios during UAT and Production phase

Developed workflows in RE-Framework for processing the Queue data

Developed workflows to process the email attachments, Assets and Credential Management

Developed workflows and Sequences to process the invoices data using Baan and LN applications

Developed workflows and Sequences to process the web applications and Summit application

Developed workflows for various Excel activities and macros

Developed Flex layouts to process the Invoices using Abbyy FlexiCapture

Train the invoices in Abbyy FlexiCapture Project Setup station and Data Verification Stations

Involve in Customer Support and Training procedures

Project 1 Invoice Processing for Benchmark Electronics, USA

Role Developer

1/22/2021 https://freesearch.naukri.com/preview/printResume?uname=bee6df2591a6f77c4cd36ef9e18bbe64515f58594f1b0f170018455c095d...

Duration 4 months

Domain Finance and Accounting

Technology UiPath 2019.4.3, ABBYY FlexiCapture for Invoices

Project Description PDF invoices sent by email are posted in Baan 5c and LN for later payment. The PDF invoice data extraction is done by Abbyy FlexiCapture.

Project 2 LBG Markets RPA Pilot for Lloyds Bank, UK

Role Developer
Duration 5 months
Domain Banking domain
Technology UiPath 2018.2.4

Project Description There are 4 process Onboarding, Booking, Quotation, Execution.

Onboarding: Existing clients who wish to initiate a commercial fixed rate defined break cost loan, first need to be onboarded in HUB. The robot will take an incoming transaction request, which is generated by Eloans , and use the information to set up a client record in HUB.

Booking: After a client is onboarded, they will work with their Relationship Manager to outline the terms of the fixed rate DBC loan. Once the client/RM have reached an agreement, the RM will email a request, called the "deal ticket", to the FRL Support team in Glasgow to process the loan. The robot will take an incoming "deal ticket", build a loan schedule which outlines the payment terms and then hedge the bank against interest rate exposure, by booking in rate swaps in Summit

Breakage Quotation: If at any point the client wishes to terminate the loan, the robot will generate an up-to-date quotation of what it will cost them.

Breakage Execution: If the client accepts the breakage quotation and wishes to proceed, the robot will generate the final breakage costs, issue them to the client, and then terminate the rate swaps in Summit.

Project 3 Invoice Report for Air Liquide, Malesia

Role Developer

Technology UiPath 2018.1.2, ABBYY Flexi Capture 12

Project Description Invoice Report Generation is a process in which the invoices are taken as a input and the corresponding values are read through ABBYY Flexi Capture and the reports are stored in Excel through Uipath. This can be done by integration of ABBYY Flexi capture with UiPath.

Project 4 Job Portal Role Developer

Technology Dotnet, C#, sql Server and ASP.NET

Project Description Job Portal Application is a Web application. It helps in automating the resume Filters and Jobs. It's a Workflow Management System, which makes working easy and fast for

Jobseekers, Employer and Admin. It is an end to end account receivable system that is Capable of monitoring and performing resume works and jobs.

TCS as Engineer -RPA Apr 2016 to Till Date

I have 4.6 years of IT experience in Robotic Process Automation (RPA) implementations using UiPath. I have been working extensively within UiPath. My passion lies within optimization and innovation with primary focus and interest in building any RPA bots or code that provides optimization and improve end customer experience.

Education

UG: B.Tech/B.E. (Electrical) from QIS College of Engineering and Technology, Ongole in 2015

Other Qualifications/Certifications/Programs:

RPA Advanced Developer Certificate
