Developer seeking roles in Software Engineering, Software Development, Project

Management, Change Management, Defect Management, Quality

Management, Requirement Gathering, Application

Support, Debugging, Python, Django, MySQL, JIRA, HTML, C

Current Designation: Python Developer

Current Company: Skanda It Solutions Pvt Ltd

Current Location: Bengaluru / Bangalore

Pref. Location: Chennai, Hyderabad, Secunderabad

Functional Area: IT Software - Application Programming /

Maintenance

Role: Software Developer

Industry: IT-Software/Software Services

Marital Status: Single/unmarried

Key Skills: Software Developer, Software Engineering, Software Development, Project Management, Change

Management, Defect Management, Quality Management, Requirement Gathering, Application

Support, Debugging, Python, Django, MySQL, JIRA, HTML, C

Verified: Email - id Phone Number |

Last Active: 22-Jan-21 Last Modified: 22-Jan-21

Summary

Total 3+ years of professional experience in Python technology.

Good experience in Python coding.

Expertise in web technologies using python with DJango, Flask, MYSQL, SqlLite.

Good working experience in MySQL.

Experience in working with various python integrated development environments like IDLE, Pycharm, Jupyter, Visual studio, Netbeans.

Experienced in domain of web Scraping/Crawling.

Resourceful team member and capable of delivering tasks within stringent timeline.

Ability to work in a team as well as independently.

Capable of quick learning and delivering solutions as an individual and as part of a team.

Extensive experience in debugging / resolving problems.

Work Experience

Skanda It Solutions Pvt Ltd as Python Developer

Oct 2017 to Till Date

Key Projects:

- Clients:
- Kg Data
- LATAM
- MVP

Technology: Python, Scrappy, MySQL

Project 1

Project name: Kg Data (Knowledge Graph Data) Roles and Responsibilities: Python Developer

Project description: This project deals with entertainment stuff where we take the data from the Rovi, Freebase, Wikipedia and other sources under entertainment (movies, tv shows, person, sports, channels, etc).

We will segregate the data based on each type and data parsing in correct format for all the fields. Finest information is considered after comparison of sources data along with incremental patch and deliver Enriched metadata to client.

Project 2

Project Name: LATAM (Latin American)

Roles and Responsibilities: Developer in crawling and data quality maintenance

Project description: This project is the extension of OUTBOUND. The data crawled is based on region wise. This project has huge number of website needs to be crawled for the entertainment data to provide client. We have crawled 300+ crawlers across the world including IMDB, NETFLIX, HOTSTAR, etc.

Our team contains 15 members. My role is to give training on how to write crawlers and assigning task to team and make the things to happen.

I have good hold on managing people including freshers and experienced.

Project name: MVP (Minimal Viable Project) Roles and Responsibilities: Python Developer

Project description: This project is of crawling the data from different websites and storing the entire data source wise in

Database. Data is parsed in correct format for each field source wise.

We will be generating a unique gid having map with all meta data details like title, aka, release year etc. Data will be

loaded to Aws S3 bucket and deliver the data to client.

Education

UG: B.Tech/B.E. (Electrical and Electronics Engineering) from TRR Engineering College, Hyderabad. in 2016

IT Skills

Skill Name	Version Last Used Experience
Python, C, HTML5, Django,Flask
