Developing & enhancing tools for continuous integration, automated testing and release management

Designing, developing and enhancing operational processes including automated backup and recovery procedures, security and patch management

Team Management & Leadership Support

- Exposure to Liberty and WAS migration projects to supervise remote management & maintenance
- Worked on Liberty and JBOSS templates with ICS team and was involved for Vault POC for SCS upgrade projects
- Led a team of 10 for cloud, JBOSS and Liberty migration projects.
- Collaborating with client leadership and architecture to identify toil in the current workflow.

- Stewarded end-to-end implementation including deployment management, environment setup, incident resolution, assisting Dev/QA teams and release orchestration - using UCD, Remedy and Client Specific Release Management Dashboards
- Ability to work with Product Owners, Scrum Masters and application developers to ensure the quality of the software merging to a release.
- Prepared seamless implementation plans and drove multiple go-live implementations flawlessly
- PoC performed on OpenShift for Container Platform Deployments, in support of potential phased public cloud
- Represented the team in enterprise level technical round table conferences for selection of deployment orchestration tools
- Coordinate/assist developers with establishing and applying appropriate branching, merging conventions using GIT
- Working knowledge of source code and configuration management solutions (SVN, Git, etc.) and Proficient in version
- Assist in management the build and release process including packaging build artifacts and collateral.
- Strategize on best practices for ongoing parallel development, featuring branching, merging, and common library management
- Configured and maintained Jenkins to implement the CI process and integrated the tool with Maven to schedule the builds and deployment on the servers.
- Continuous Delivery is being enabled through Deployment into several environments of INT,SYS,UAT,QA ,PROD and Post Prod regions.
- Experience migration of end to end Environment setup and deployment activity of JBOSS, Liberty, WAS and Cloud migration from Dev to Prod regions.
- Independently led initiatives to set-up, install, configure and migration of static and cloud platforms and was also involved for regular deployment and release activities, with risks/issues promptly addressed
- Exposure of Layer7, Loadbalancer, IHS setup, IBM Websphere and Irule redirection.
- Exposure of Hashicorp vault implementation along with springboot and JDK upgrade.
- Functional and technical upgradation of team
- Review requirement which includes requirements gathering, designing, coding, testing, and deployment
- System analysis, client interaction, bug identification and resolution
- Led a team of 9 resources to develop and migrate Application to new platform.
- Ensuring timely project delivery by liasing with key stakeholders, Development, Architects & Developers.
