Last Active: 21-Jan-21 Last Modified: 21-Jan-21

Summary

Presently working with Gainwell Technologies/DXC Technology as IT Specialist in Product Development (HPP) and Have much experienced in Application Development & Enhancement, Client Relationship Management; performed complex analysis, designing and programming to meet business requirements in Health Care, Education, Telecom, Gym management, Intranet Utility and IOT platform Domain.

Participated in the team's agile software development process; developed unit tests and functional/integration tests; supported production deployments of developed solutions

Proficient in end-to-end development of software products from requirement analysis to system study, designing, coding, testing, de- bugging, documentation and implementation in Microsoft Visual Studio .Net IDE using C #, ASP.NET, MVC, ADO.NET, Entity Framework and SQL Server

Capable of analyzing information system needs, evaluating end-user requirements, custom designing solutions, troubleshooting for Software Applications

Work Experience

Gainwell Technologies - DXC Technology as IT Specialist

Jul 2018 to Till Date

Developing software solutions by studying information needs, conferring with users, studying systems flow, data usage, and work processes

Understanding process requirements and providing use cases for business, functional & technical requirements Interacting with users for requirement gathering; prepared functional specifications and low-level design documents; coordinating with various matrix teams, providing constructive solution

Participating in the Agile Methodology right from requirement analysis, documentation (functional specifications, technical design), coding and testing (preparation of test cases along with implementation) to maintenance of proposed applications Member of the team of 10 that developed and managed an application which improved productivity of 10 (number) subsystems

Coded, implemented and integrated complex software programs using technologies such as C#, jQuery, ASP.NET MVC; troubleshot and debugged new or existing software programs

Identified and fixed 100+ bugs by programming with C#, jQuery, SQL; integrated unit tests of C#, jQuery, TFS Tool into a nightly-build which increased line of code coverage by 99%

Cleared 5+ of pending Change Requests (CRs) within a month with the help of 2 other testers which led to the project team meeting the software release date and with high quality

Created 10 (number) test modules with estimated 500 test cases to ensure 99% coverage for web application testing across different

Performed detailed design of modules such as NMS, RMT, MF along with their implementation, and documentation; integrated software modules developed by other team members, and performed integration testing; successfully implemented the MF and RFIP functionalities

Conducted Unit Testing of applications; identified and resolved the 50 bugs in MF module

Designed and implemented a web application using technologies such as ASP.NET that streamlined MF; this application cut set-up time and reduced human error

Wipro as Senior Software Engineer Mar 2018 to Jul 2018

Software Development

Plasma Softech Pvt. Ltd. as Senior Software Engineer (IT-Application)

Jun 2014 to Jan 2018

Responsibilities:

Developing software solutions by studying information needs, conferring with users, studying systems flow, data usage, and work processes Understanding process requirements and providing use cases for business, functional & technical requirements

Interacting with users for requirement gathering; prepared functional specifications and low-level design documents; coordinating with various matrix teams, providing constructive solution

Participating in the Software Development Lifecycle (SDLC) right from requirement analysis, documentation (functional specifications, technical design), coding and testing (preparation of test cases along with implementation) to maintenance of proposed applications

Highlights:

Member of the team of 15 that developed and managed an application which improved productivity of 10 (number) sub-systems

Coded, implemented and integrated complex software programs using technologies such as C#,Jquery, MySQL; troubleshot and debugged new or existing software programs

Performed unit, basic and functional testing activities using tools such as NUnit. selenium

Identified and fixed 100+ bugs by programming with C#, Jquery, MySQL ;integrated unit tests of C#, Jquery, Dameng JDBC Driver into a nightly-build which increased line of code coverage by 99%

Optimobile Pvt. Ltd. as Software Engineer

Feb 2013 to Jun 2014

Project: Club Samsung/TATA DoCoMo Playbox/MTS/Videocon - Optimobile

Role: Application Developer/Team Lead

Period Feb'13-Jun'14

Tools: WPF, Window Form, C#, MySQL, Web API

Project Brief This application is used to recharge any prepaid number using third -party paying gateway and content transfer from kiosk to handset also this application include CRBT concept through Kiosk. This application is integrated with www.paytm.com as well for online transaction using laptop and computer. Online content transfer using window service.

Anaisha Corporation Pvt. Ltd. as Software Engineer

Apr 2012 to Jan 2013

Project Equipment Quality Manager for Titania - ACPL360.com

Role: xxxx

Period Apr'12-Jan'13

Tools: Window Form, C#, SQL Server

Project Brief The purpose of this application is the Management of equipment and accessories used in materials samples analysis. The equipment can undergo Calibrations, verifications and maintenance plans. The go al of this Project is the development of a Window. Forms based application in a DLL format that will be part of a major Project, which allows the customer for integrated management of the system.

Responsibilities:

Performed Business communication for Requirement analysis, design & implementation
Designed Workflow for entire module and created Custom Steps & Components including component
for Enhancement of TAB Functionality through customizing the window Application based .net
Created custom Tab, Application Tools & Database Lookups in MSSQL Framework
Maintained MIS Reports for better business analysis and performed Performance tuning of the
application by better and proven ways of development

Provided support and solution in production issues, code review and production issue support Worked on optimization of Functionality for better performance

Tulip Telecom as Software Engineer

Aug 2010 to Apr 2012

Responsible for ASP.Net application development and Classic ASP application support for internal users of the organization

Education

UG: B.Tech/B.E. (Computers) from Punjab Technical University (PTU) in 2010
