Result-oriented Professional with over 1 years of experience in Software Development, Application Programming, Web Development, Java, HTML, CSS, Javascript, Docker, Jenkins, MySQL

Work Experience

ITC Infotech as Full Stack Developer Jul 2019 to Till Date

1.Project Title: Confirmation Of Payee Duration: November 2019 - March 2020

Role: Full Stack Developer

Tools/Technologies Used: Java 8, Spring Boot, Spring MVC, Hibernate, STS, Maven, Junit,

Angular 8, CI/CD, Microservices.

Description:

Confirmation of Payee is one of the projects in Santander that aids for online banking for the customers. This project pays details to confirmation of a payee when the user adds a new beneficiary and also the journey of a user from adding a new payee till the time he makes a payment.

Responsibilities:

Responsible for creating views during the journey when a customer is trying to setup a new payee.

UI fixes in the views.

2.Project Title: Corporate Bison Duration: April 2020 - present * Role: Full Stack Java Developer

Tools/Technologies Used: Java 8, Spring Boot, STS, Maven, Junit, A, CI/CD(Jenkins),

Microservices Description:

Bison is the corporate banking project for Santander which includes applications in the areas of corporate bulk payments and international payments product. My role in the project was one of a developer liasing with onshore team members working from analysis to development and deployment activities. I was involved in developing of batch and

Microservices applications deployed on the cloud.

Responsibilities:

As a part of migration I was responsible for creating spring batch jobs, in which I have designed as per the requested story using java to run a batch and process an input file so that the output generated can be migrated.

As a part of CI/CD I have worked on Jenkins relating to the deployment of the code, Gass/Lynx audit tool also is used as a part to verify messages when a certain event takes place after the deployment of the project

Kibana logging is also being used as the part of the project in the view of error logging 3. Project Title: Kaliber

Duration: September 2019 - October 2019

Role: Full Stack Developer

Tools/Technologies Used: Java 8, Spring Boot, Spring MVC, Hibernate, STS, Maven, Junit, Angular 8, Karma, Docker, CI/CD, MongoDB, Microservices.

Description:

Developed a platform where we promote learn and to let learn. It's aim was to gamifies the monotonous learning process and aids in calibrating the contestant on various scales. It promotes challenges and peer learning also. One can play quiz, challenge your peers, face challenges.

Responsibilities:

Responsible for CreateQuiz Microservice along with UI/UX designing of particular user story related with the above microservice along with unit and integration testing following the two-pizza team methodology.

Responsible for the entire UI for Kaliber including the landing page.

Responsible for creating boiler plate for Kaliber with all the basic microservices needed. Responsible for Creating Mongotemplate that handles complex api calls with more than 5 request parameters.
