Project Description:

VoIP:

VOIP stands for Voice over Internet Protocol. It is a technology and streaming media service based on the Session Initiation Protocol (SIP) by which Internet telephony service providers (ITSPs) deliver telephone services and unified communications to customers equipped with SIP-based private branch exchange (IP-PBX) and unified communications facilities.

Invoice:

The Subscriber's Lifecycle system has five statuses which is Active, Inactive, Non Payment, Safe Custody and Disconnected. It is an automatic Invoice system to generate the subscriber's Invoice for whole system which is register by

admin. Each subscriber's Invoice details stored in Billing Database and Invoice generation can make different billing cycle. Billing cycle triggers automatically with in configured time by Rule Engine

Nexge VOIP Billing Server consists of Rating, Prepaid / Postpaid Charging, Prepaid Renewable and Non Renewable Pins Generation, LCR and Invoicing facilities for various services being offered by VoIP Service Providers apart from a centralized Subscriber Authentication and Provisioning System. And Variety of VAS Services, Reports Generation and Administrator Provisioning Features for Subscribers and Groups view in Nexge New user Interface by table. Above the all detail table has Implements server side pagination which is every page request sends to server and retrieve records from database and it's not stored in Client Side (Browser).

CTS as Associate Dec 2018 to Till Date
